

PRONTO IN SOUTH VIETNAM

1962 - 1972

By Denis Hare OAM BEM

This book is dedicated to those who served with the Royal Australian Corps of Signals in South Vietnam

Signals Roll of Honour

Signalman B. A. Logan	145 Sig Sqn, KIA, 28 March 1967
Corporal D. J. Donnelly	104 Sig Sqn, AK, 9 August 1967
Signalman A. H. Young	104 Sig Sqn, KIA, 16 May 1968
Signalman D. E. Abraham	104 Sig Sqn, KIA, 29 Sept 1968
Warrant Officer Class Two M. W. T. Gill, MiD	AATTV, KIA, 6 May 1969
Signalman S. T. Moore	110 Sig Sqn, Died, 25 Aug 1970
Signalman D. A. B. Wallis	110 Sig Sqn, Died, 17 March 1972

Lest We Forget

October 2021 - Version 4

Prepared from old notes, old memories and old Army records, for the enjoyment
of past and future communicators and their families
by Denis Hare OAM BEM

ACKNOWLEDGEMENTS

The base material for this Web based book was from an old document draft 'Royal Australian Corps of Signals Corps History - The South Vietnam Campaign 1962 - 1972' which was attached to the GOC's Exercise Hindsight 1971, exercise papers. Gerry Lawrence prepared the draft. Thank you Gerry for the foresight because without the document, this Web based book would not have been possible.

PREFACE

Communications have always been an important factor in war - sometimes the decisive one. When the great potential of mobility can be exploited by optimum communications, the products are those which commanders through the ages have always sought - flexibility, economy of force, surprise, and the ability to concentrate, deploy, regroup or disperse rapidly.

In Vietnam, probably for the first time in history, communications were able to match in dimension and efficiency the great advances in mobility. The helicopter, allied with the more traditional means of tracked vehicles, aircraft, small ships and boats, made possible the application of concepts which were not new in principle but which previously could never be more than partially implemented. These concepts extended into every field of activity - tactical, logistic and administrative. But primarily they depended for their success on communications, because without them the many complex activities which had to proceed simultaneously and in co-ordination could not have been controlled. Command in any military sphere does not automatically confer the ability to control; communications alone can confer that.

Major General S. C. Graham, D.S.O., O.B.E., M.C.
8th June 1977

(Brigadier Graham commanded 1st Australian Task Force in 1967)

OVERVIEW OF RASIGS UNITS DEPLOYED TO SOUTH VIETNAM

Timeline - RASIGS Units in South Vietnam

Role Summary

- 709 Signal Troop - Forward and Rear Signals for AAFV**
(Authorized Strength = 50 - September 1965)
- 527 Signal Troop - Forward and Rear Signals for AAFV (additional manpower)**
(Authorized Strength = 28 - September 1965)
- 547 Signal Troop - Electronic Warfare Support for 1 ATF**
(Authorized Strength = 36 - June 1968)
- 103 Signal Squadron - Task Force Signals for 1 ATF**
(Authorized Strength = 124 - June 1966)
- 104 Signal Squadron - Task Force Signals for 1 ATF (replaced 103 Sig Sqn)**
(Authorized Strength = 146 - June 1968)
- 110 Signal Squadron - Force Signals for AFV (replaced 145 Sig Sqn)**
(Authorized Strength = 243 - June 1968)
- 145 Signal Squadron - Force Signals for AFV**
(Authorized Strength = 173 - June 1966)
- Detachment 152 Signal Squadron - Signals for SAS Sqn's, 1 ATF**
(Authorized Strength = 16 - June 1968)
- AAAGV Signal Detachment - Rear Signals for AAAGV**
(Authorized Strength = 12 to 15)

Note: RASIGS personnel also deployed with HQAFV, HQ1ATF, HQ1ALSG, AATTv, AAAGV, 1 Aust Civil Affairs Unit, 32 Small Ship Squadron and other Units. Members on detachment from 127 Sig Sqn are either detail as part of a RASigs South Vietnam Unit or HQAFV.

CHAPTER 1 - EARLY DAYS

First Pronto

On the 3rd August 1962 the first '**Pronto**' Captain Barry Tinkler arrived in South Vietnam.

He was a member of the Australian Army Training Team Vietnam (AATTV). This unit was eventually to become the most highly decorated unit in the Australian Army.

During the innumerable briefings that followed in Saigon and during that slow, painful DC3 flight to Da Nang and finally to Phu Bai, Captain Tinkler was not to know that he was to serve in the theatre for 14 months nor that he would be recommended for the first award of the campaign. He eventually received the award, a Member of the Most Excellent Order of the British Empire, from the Governor General of Australia, Viscount De Lisle, in 1965.

His thoughts during that flight could not have included the many experiences he was eventually to have with the Civil Guard Training Centre at Hiep Thanh, located several kilometres from the headquarters of 1 ARVN (Army of the Republic of Vietnam) Division. He was not to know that he would be involved in activities from platoon size ambushes to eight company search and destroy operations. The training of officers for the 1 ARVN Division, the distribution of relief supplies to Montagnards in the remote north west of South Vietnam, particularly Khe Sanh, and signals advice to ARVN and ranger units in the Kontum and Pleiku areas.

Photo 1.1 (left) - AATTV Plaque.

Photo 1.2 (right) - AATTV Warrant Officer training ARVN soldiers in 1965.

It was Captain Tinkler's tour of duty which opened a new chapter in the history of the Corps. Four other officers and twelve warrant officers of RA Sigs also served with AATTV, with one, Warrant Office Class Two M.W.T. Gill, being killed in action on 6th May 1969. See Chapter 5, Part 4 for more details of RASigs members serving with AATTV.

Reorganisation

By the end of 1962 and through 1963 it was becoming apparent that Australian combat troops were going to become involved in South Vietnam. The Director of Signals, Colonel R. P. Woollard, initiated an examination of RA Sigs field force organisations for their suitability against the concept of committing small combat forces as part of a larger international force assisting a country such as South Vietnam.

At that time the divisional signal regiment was designed for a division and nothing smaller - whilst communications zone signals establishments were based on "brick" troops using World War II equipment.

The study resulted in task force signal squadrons, a differently organised divisional signal regiment, and a functional structure for communications zone elements which could be tailored into squadrons and regiments for specific tasks.

At the same time as this reorganisation, the designations of signals units were changed to a block numbering system for regiments, squadrons and troops. This system had its disadvantages but had the major advantage of preserving the continuity of the name of each unit, instead of it changing as the supported unit changed.

This reorganisation and the numbering system caused much controversy within the Corps. Despite the emotion, a major reorganisation of field force signals units was completed before any squadrons were committed to South Vietnam.

It enabled the first signals squadrons to be prepared and dispatched to South Vietnam with far fewer administrative problems than would have arisen with the earlier establishments.

Re-equipment

The prospect of a South Vietnam campaign also influenced Colonel Woollard's equipment decisions in 1963 and 1964. In addition, there was a growing conviction that future military involvement would be with American rather than British forces.

This led to orders being placed for standard US radios and packaged 'shelter'

equipment. At this time the highly successful AN/PRC-25 VHF manpack radios and AN/VRC-12 series VHF vehicular radios were ordered. Also ordered were the ill fated AN/TRC-75 medium power HF radios.

Photo 1.4 - AN/PRC-25 VHF Radio Set - Front panel layout.

Photo 1.5 - RT-524 Transceiver (Part of AN/VRC-12 series).

This equipment were received in time for our units to be predominately equipped with them by the time they were deployed in South Vietnam.

Photo 1.7 (right) - Inside of AN/MRC-69 Radio Relay Shelter showing AN/TRC-24 Radio Set.

Training

When National Service was introduced and it was decided that National Servicemen could serve in South Vietnam, the School of Signals at Balcombe, Victoria was unable to cope with its training commitment. It had insufficient space and too few instructors.

A contract was let with the Marconi School of Wireless in Sydney to conduct part of the training for operators and technicians. The trainees were administered by a School of Signals Wing established at Ingleburn.

This was another controversial move. The issue was the lack of Corps indoctrination and a lower level of instruction. To an extent, all Marconi trainees completing their trade training at the School of Signals overcame this.

CHAPTER 2 - 709 SIGNAL TROOP

2 Signal Regiment

In late April 1965, 2 Signal Regiment in Watsonia received a warning order to form a composite troop of 50 all ranks and move it into a concentration area in Ingleburn.

The order was typical of previous exercises and the troop commander, Captain Richard Twiss, thought the task would be the provision of a high frequency rear link within Australia. However he was given the run of the regiment in selecting his men to form up a heavy radio detachment, a medium radio detachment and a communications centre detachment.

Preparations

Captain Twiss selected Lieutenant Nev Grieve as the second in command of the new troop, 709 Signal Troop, because no operator had ever seen an AN/TRC-75, now the basis of a medium radio troop, and Lieutenant Grieve had had the task of bringing them into service. Even then there were training problems as there were only two AN/TRC-75's in 2 Signal Regiment and the troop needed three. The third was later received direct from the manufacturer.

It was early May before Captain Twiss was told that the role of 709 Signal Troop was to support Headquarters Australian Army Force Vietnam (HQ AAFV) by providing a rear link to Australia and a forward link to a battalion group. He was not told where HQ AAFV (later redesignated HQ AFV (Army Component)) nor 1 Royal Australian Regiment (1 RAR), the infantry component of the battalion group, were to be located in Vietnam.

After 709 Signal Troop concentrated in Ingleburn its main tasks were to get equipment serviceable, to carry out tropic proofing and to acquire maintenance stores.

First Communications

Captain Twiss arrived on an Air Vietnam plane at Tan Son Nhut airport in Saigon with the small Force reconnaissance party on 25th May 1965.

He immediately contacted the US 39 Signal Battalion, the only US signals unit in theatre at that time and one with which RA Sigs was to have a lot of contact in the future. He also found that HQ AAFV was to be in the Cholon area of Saigon whilst 1 RAR Group would be with the US 173 Airborne Brigade in Bien Hoa about 30

kilometres away.

The advance party arrived at Tan Son Nhut by RAAF C130 at the beginning of June 1965. There were now 7 members of 709 Signals Troop present and they had two AN/TRC-75's and four generators.

Diagram 2.1 - AAFV Rear Link Communications (May 1965).

They set up in a US 39 Signal Battalion area at Tan Son Nhut, ran some D10 cable into HQ AAFV in Cholon and by the morning after their arrival were ready to call Melbourne on CW with an AN/TRC-75 feeding its rod aerial. They were very jubilant when their first call was answered.

This started six and a half years of communications with and dedicated service by 6 Signal Regiment in Victoria. Over the next few weeks, communications to Melbourne were opened on CW and then went to keyboard for about 4 hours. There was little priority traffic. The major problem was long press releases which were classified, as they had to be cleared in Canberra, and only off-line encryption was available; they also had a priority precedence and many had to be sent by hand speed morse.

The AN/TRC-75

The bane of the existence of 709 Signal Troop, the Directorate of Signals, Army Design Establishment and others in those days was the AN/TRC-75.

This radio was used most successfully by the US Air Force and the US Marine Corps in its originally designed simplex mode. The Australian sets were modified for duplex operation and came equipped with a different generator, the infamous Bucknell. Our problems were compounded by our total inexperience with the equipment and a handbook which was for the unmodified radios.

In an immediate effort to improve the circuit to Melbourne, a long wire antenna was erected. Each time an attempt was made to load it, the AN/TRC-75 aerial tuning unit burned out. It took a few burn-outs before it was discovered that the Australian version of this radio could only load a whip or a balanced antenna, something not mentioned in the US handbook. The Bucknell generators initially would run for only about 6 hours before blowing an oil seal. In the first three weeks, power to the radio was maintained by constantly repairing the four generators and then acquiring two different generators from the USAF.

The Bucknell generator had a 400 hertz output, necessary for the AN/TRC-75, and so it was not possible to operate the radios from the mains supply at Tan Son Nhut.

Heavy Radio Detachment

The main body of 709 Signal Troop arrived by sea at the end of June 1965. Within a day the heavy radio detachment was sited and ready to operate.

Photo 2.4 - Transmitter site at Tan Son Nhut (June 1965).

The Australian made E514 transmitter was located, in its vehicle, within 50 metres of the perimeter of Tan Son Nhut, close to an HE dump on one side and a napalm one

on the other.

General Wilton, then Chief of the General Staff, recalled visiting Captain Twiss **"on the fringe of the airfield. He was very hot and worried and looked harassed. This was not surprising because apart from his technical problems there was a security problem. He was beyond the perimeter defences and after dark could have been a very easy target for the VC."**

Surprisingly, even with the sloping V antenna, there was no interference to adjacent USAF receivers. The main transmitter problem was the pair of unreliable 25 KVA generators, and since a 240 volt input was required no support could be sought from the US. Also, there was no possibility of US technical support for the transmitter.

The receivers were co-located with the US STRATCOM receivers in Tan Son Nhut and a pair of sloping V Antennas were erected in the US antenna farm. There was commonality of equipment and power.

Diagram 2.2 - AAFV Rear Link Communications (June 1965).

The transmitter and receiver sites were about 6 kilometres apart; it was about 15 kilometres from the transmitter site to HQ AAFV and about 12 kilometres from the

receivers to the headquarters. All interconnecting circuits were initially by D10 field cable which was then duplicated with spiral 4. Two rigger/linesmen laid all this cable in 10 days.

The speed of setting up was not matched by the time taken to establish a satisfactory circuit to the Primary Relay Station in Watsonia. The engineering took a week primarily because of technical and traffic procedural differences between 709 Signal Troop and 6 Signal Regiment. The keying lines wandering around Saigon also caused problems.

Eventually the circuit settled down to a single channel traffic availability of 14 or 15 hours. An engineering channel was also maintained. All encryption was off line, which made for slow clearance of traffic.

Manpower

The troop lacked sufficient men for all its tasks. For 24 hours a day it had to man the rear link transmitter and receiver, the communications centre and the cipher office, both ends of a one-to-one AN/TRC-75 link to 1 RAR Group plus the switchboard there, it had to provide a VHF manpack detachment for the battalion rear link when away from Bien Hoa and it provided an alternative HQ AAFV rear link to Australia using an AN/TRC-75 located in Bien Hoa. Other units supporting the force were also having problems through manpower shortage.

Improvement

In July 1965, 709 Signal Troop was having more than enough problems. Apart from the manpower shortage, equipment failures were frequent and the US was unable to give technical support for some major items such as transmitters and generators. The telegraph machines, telegraph terminals, off line cipher machines and receivers were the only common equipment's and the US gave good support to them. Much advice went from 709 Signal Troop to the Directorate of Signals at Army Headquarters Canberra but no real help seemed to be possible.

The problems of the theatre itself and of the technical situation did not seem to be adequately known in Canberra. 709 Signal Troop was virtually operating in a tactical role (all major equipment was still mounted in vehicles) whilst its basic task was to work into a fixed communications network.

Major Bill Bodger, a staff officer with the Directorate of Signals, was called from a meeting he was chairing in Sydney in mid July 1965 to take a telephone call. After confirming his inoculations were all up to date, he was told he was to visit South Vietnam beginning in 2 days' time.

Diagram 2.3 - AAFV Communications (July 1965).

Major Bodger was to go for a week to assess the signals situation, seek better sites and obtain improved in-theatre technical support, but he stayed for nearly 6 weeks.

One of the first sights to greet him was melting solder on telegraph machines in the unairconditioned communication centre vehicle which had to be parked in the sun along side the building HQ AAFV occupied.

Apart from confirming the reports Captain Twiss had been sending, being an officer of field rank gave Major Bodger some advantages which a captain lacked in discussion with US officers.

Being an experienced technical officer, Major Bodger with Staff Sergeant John Grindley of 709 Signal Troop, planned a communication centre in a newly allocated HQ AAFV building adjacent to its existing building. He then arranged local supply of materials and supervised the installation.

Undoubtedly the prime outcome of Major Bodger 's visit was the increase in strength and equipment. 527 Signal Troop arrived with 2nd Lieutenant Jock Lonie and 29 NCO's and other ranks on 14th September 1965.

Photo 2.8 - Cpl Rex Gabel, 709 Signal Troop, transmits in morse code at Bien Hoa to HQ AAFV in Saigon. The radio set in use is the medium-power AN/TRC-75 (Sept 1965).

New telegraph equipment arrived and the troop received AN/PRC-47 radios which had just been delivered to the Australian Army. These man portable HF radios allowed 1 RAR to deploy further from Bien Hoa than the 40 kilometre limit which the VHF manpack radios imposed. This radio is normally complete with lightweight nickle cadmium batteries but the equipment received by 709 Signal Troop had lead acid accumulators and petrol engine charging generators which restricted portability.

At the end of October 1965, HQ AAFV moved into the Free World Military Assistance Organisation (FWMAO) building and so a new communications centre had to be provided. This was planned and installed to fixed station standards by a detachment of 127 Signal Squadron under the command of Lieutenant Owen Richards. It included the vast improvement of on line cipher. The rear link to Watsonia now had one classified circuit plus one unclassified and one engineering circuit.

Traffic availability had now risen to about 13 hours a day and there was some relief for operators.

Also at this time a classified line circuit, with AN/TRC-75 back up, was opened to 1 RAR in Bien Hoa and a formal DR service between HQ AAFV and Bien Hoa began.

New receivers, the fixed station equipment R5232, were installed in a Kingstrand hut at the same Tan Son Nhut site.

Photo 2.9 - 6 RAR on patrol with new VHF radio communications (1966).

New Transmitter Station

The E514 was still operating out of its vehicle in Tan Son Nhut. A new site was allocated in a military compound at Phu Tho in Saigon.

Australian sappers loaned a bulldozer to RA Sigs and men from 709 and 527 Signal Troops promptly cleared the area, constructed a rhombic antenna to fixed station standards, built an air-conditioned Kingstrand hut for two new E513 transmitters and drive equipment. They also put up a shed to house the three new 30KVA generators.

The new installation was commissioned in April 1966. Circuit availability improved, generally to about 22 hours a day.

Keying lines were still spiral 4 but identification had become a problem. When these lines were installed less than a year before, they were on a pole route with only a few other lines belonging to US or ARVN forces. By April 1966 there were some 200 spiral 4 cables on the one route. Linesmen of 709 Signal Troop had painted red kangaroos on all connections but identification was still difficult. One way some allied forces overcame the problem was to cut a cable and then wait and see who turned up.

Force Increase

One of 709 Signal Troop's last tasks was to set up an AN/TRC-75 link from Saigon to

the port of Vung Tau in preparation for the arrival of 1 Australian Task Force (ATF) and supporting units. These included 145 Signal Squadron, which took over from 709 and 527 Signal Troops.

Major General K. Mackay, the first commander of AFV (for nearly 3 years) commented later. ***"Like other senior commanders I was well aware of the fact that tail to teeth would be at least 2 to 1 for a small force and a separate independent national communications link from the Force to Australia was essential. However US willingness to provide all we needed (the US, for United Nations purposes, desperately wanted another Western nation to join them quickly) plus our political need for maximum mileage from the smallest number produced a force with mostly teeth and little tail. This had serious repercussions for Engineers, Signals, etc. Our tactical communications were always good but it was not until we were able to deploy more supporting arms, including Signals, and we got our share of modern equipment that we were happy with our communications"***

CHAPTER 3 - FORCE SIGNALS (THE BEGINNING)

The Increased Force

Australian Army forces in Vietnam were increased in April 1966 to a task force (1 ATF) of two battalions, with a third battalion added in December 1967, and supporting combat units. The Australian Logistic Support Company that had been in theatre since May 1965 was also expanded to a logistic support group (1 ALSG). A squadron of RAAF Iroquois helicopters, a flight of Caribou transport aircraft and a squadron of Canberra bombers were added to the Australian forces in theatre. The RAN maintained a destroyer on station off Vietnam.

HQ AFV remained in Saigon. 1 ATF was established at Nui Dat, some 65 kilometres from Saigon to the east, whilst 1 ALSG set up at Vung Tau, also 65 kilometres away from Saigon but to the south east (Vung Tau to Nui Dat was about 25 kilometres). The RAAF 2 Squadron operating Canberra tactical bombers, occupied a base at Phan Rang, about 275 kilometres north east of Saigon but the other RAAF units were based at Vung Tau.

145 Signal Squadron

The first elements of force signals, 145 Signal Squadron, arrived in South Vietnam, 1st April 1966. The unit was formed on the 'brick' system and had initially a headquarters and a number of Signal Troops (506, 520, 552 and 581 plus 527 and 709 absorbed into the Squadron) with a total strength of about 165 all ranks.

Photo 3.1 - 145 Signal Squadron at Vung Tau (Back Beach). Note the AN/TRC-24 Antennas (1966).

Major John Bird, Officer Commanding 145 Signal Squadron, had the additional task of Staff Officer Signals at HQ AFV. It was not until March 1967 that Major Dave Commerford was posted as SO Sigs, allowing Major Bird to concentrate on commanding his squadron.

Communications Changes

By June 1966 the Australian signal centre and switchboard at Bien Hoa had been closed and the SDS from Saigon to Bien Hoa ceased.

Telegraph communications were opened over US bearer circuits from HQ AFV to HQ 1 ATF and to 1 ALSG, from 1 ATF to 1 ALSG and from 1 ALSG to the RAAF Communications Centre at Vung Tau.

US Bearers also provided two voice channels from HQ AFV to HQ 1 ATF. A voice channel was established to the 1 ALSG switchboard, code named '**EMU**' and the 1 ATF switchboard '**EBONY**'. These names were unchanged when the switchboards closed more than 6 years later.

Photo 3.2 (left) - Lineman climbing pole (1966).

Photo 3-3 (right) - Lt Brian Stevens, 145 Signal Squadron with pet monkey on VC Hill - AN/MRC-69 in background (1966).

Theatre Communications

The rear link from Saigon to Melbourne continued to provide one secure duplex RTT traffic channel and an insecure engineering channel over the HF SSB circuit.

Availability of the traffic channel in each direction was a little over 21 hours per day, propagation conditions being the major cause of outages.

With the increase in the force being effected it was hardly surprising that the total number of messages handled by force signals (rear link and in-theatre traffic) rose from around 6,000 in January and February 1966 to over 11,000 in May, the rear link accounting for nearly 7,000. It seemed a lot then, but in a few years traffic levels were varying by that much a month with the rear link alone handling an all time record of 38,888 in May 1971.

By July 1966, 145 Signal Squadron had installed VHF radio relay trunks using the AN/MRC-69 Radio Relay system. This interconnected HQ AFV at Cholon to 1 ALSG at Vung Tau via a repeater at VC Hill in the Vung Tau area. Another link from Nui Dat to Vung Tau provided channels from HQ 1 ATF to 1 ALSG and HQ AFV.

Photo 3.4 (left) - 145 Signal Squadron AN/MRC-69 Shelter sandbagged at Vung Tau (1966).

Photo 3.5 (right) - 145 Signal Squadron AN/MRC-69 Shelter sandbagged at Nui Dat Hill (1966).

A daily force Aerial Dispatch Service (ADS) was established using a Sioux helicopter from 161 Recce Flight of 1 ATF. This run included HQ AFV, HQ 1 ATF, 1 ALSG, RAAF Base Operations Centre (Vung Tau) and the US Headquarters II FFV located at Long Binh and having operational control of 1 ATF.

A communications centre was opened at Vung Tau by 581 Signal Troop (part of 145 Signal Squadron) on 7th July 1966. At Nui Dat, the task force signal squadron opened its communications centre, along with cipher, radio, switchboard and SDS services.

On the 28th March 1967 the first signal death occurred, when Signelman B. A. Logan from 145 Signal Squadron (552 Signal Troop) was KIA when an ACV was hit, whilst attached to US 11 ACR on Operation PORTSEA. The search and destroy operation, involving US, South Vietnamese and Australian forces in the most eastern region of Phuoc Tuy Province.

Diagram 3.1 - AFV Communications (July 1966).

110 Signal Squadron

In April 1967 elements of 110 Signal Squadron, commanded by Major Ted Hynes, arrived to begin the relief of 145 Signal Squadron and by May 1967, 110 Signal Squadron had taken over all responsibilities for force signals. This was the last occasion on which unit relief was conducted for RA Sigs units. Individual relief was adopted and unit designations did not change.

With basic facilities established, improvements were installed. By early 1967 a comprehensive system of telegraph and voice channels, with various alternatives, existed over radio relay, line and radio circuits and through the SDS. But the system, including the fixed facilities at Nui Dat, hovered near collapse with marginal radio relay circuits, switchboards being used well beyond the role for which they were designed. Keying lines frequently subject to damage, unreliable generators and overworked battery chargers, insufficient men for all the tasks now required, equipment defects and other difficulties. The SO Sigs and two squadron commanders wondered if they could hold on long enough until the problems were overcome.

Photo 3.6 - Setting up Vung Tau for 110 Signal Squadron (1967).

CHAPTER 4 - TASK FORCE SIGNALS

103 Signal Squadron

1 Signal Regiment in Ingleburn formed 103 Signal Squadron in 1965. It had an advantage over 709 Signal Troop as it was known that 103 Signal Squadron was to train for service in South Vietnam.

At that time the squadron was approaching full strength but it had equipment problems. It held UK C11/R210 and C42/C45 radios but had to change to the AN/PRC-25 VHF manpack radios and the AN/PRC-47 and AN/GRC-106 HF radios only about a month before departing for South Vietnam.

Photo 4.1 - C42/C45 Radio Set.

Photo 4.2 - Two AN/GRC-125 Radio Sets in retransmission configuration. Note Vehicle mounted version of the AN/PRC-25 Radio Set.

Photo 4.3 - AN/PRC-47 HF Radio Set.

Photo 4.4 - AN/GRC-106 HF Radio Set.

After unit training, formation training was held with HQ 1 Task Force, 5 RAR, 6 RAR and supporting units in the Gaspers area (North of Sydney, South of Singleton) for about 10 days. This exposed several problems, amongst them, the hard top Landrovers, which did not go overseas with the squadron. Switchboard and line capacity proved to be inadequate so extra capacity was taken to South Vietnam.

Although scheduled, because of insufficient time before deploying most of the unit members did not receive jungle warfare training. Only the units dozen or so National Servicemen receive the training at the Canungra Jungle Training Centre (JTC). This made life difficult in the early period in South Vietnam for the unit.

Move to South Vietnam

Major Peter Mudd, Officer Commanding 103 Signal Squadron, with Lieutenant Bill Elliott and Sergeant Gary Fizzell went by air to arrive a few days before Sergeant Vincent Good and a party of 20, with unit stores arrived in May 1966 on HMAS Sydney. Loading the vehicles emphasized a major unit problem - of the 22 FFR (Fitted-for-Radio) Landrovers, 8 had to be towed onto HMAS Sydney because they were unserviceable. Another group of about 10 men arrived by air the day after HMAS Sydney arrived. A couple of day's later, Captain Duncan Spencer and the remainder of the squadron arrived by air.

The Task Force occupied what was known as the Back Beach at Vung Tau. Although 103 Signal Squadron had its communication centre fully operational other activities were mainly the deployment of some radio detachments. The squadron became acclimatised and familiar with their very new radios.

After about a month on Back Beach the Task Force moved up to Nui Dat in Phuoc Tuy Province in early June 1966. Some of the squadron went in their unit vehicles but mostly movement was by Chinook helicopter landing on the inter-provincial road (LTL/2) that run pass the position and walked across the creek into the rubber plantation. Each member of the unit carried a piece of tentage as well as their normal personal equipment. On arrival the unit deployed in the rubber for some time as the Task Force Officers considered the layout. The unit setup into an area that faced what was soon to be known as Kangaroo Pad - immediately in front of the squadron's lines, guarded and patrolled by the squadron and its successors for years to come.

The wet season had arrived when Nui Dat was occupied which added to the problems of getting established. The Squadron Sergeant Major, Warrant Officer Class Two Clifford King recalls when laying out the line for the dannet wire, Sergeant Alan Turner was the escort as they move along the edge of the rubber. Alan heard a noise in the scrub and let go a burst from his Owen Machine Carbine (OMC) only to see a poor startled bird take flight. Clifford did not need any laxatives on that day! In the early stages, men of the squadron worked more then 16 hours a day to establish the defenses and provide communications for the Task Force.

Setting Up

Nui Dat was a small hill. A pimple on a large flat area, it offered excellent VHF radio communications over the area of operations of the task force. Radios were set up on this feature and remotely controlled from the headquarters over more than a kilometre of cable.

The squadron immediately established the VHF voice command net using the ubiquitous AN/PRC-25, and the HF telegraph net, essentially as envisaged by the unit establishment. The linesmen became possibly the hardest worked men in the squadron and by June the SB-86/PT switchboard had 56 subscribers.

Vehicle SDS began with 4 runs a day as soon as the task force occupied Nui Dat. Each run took two DRs as the area was not completely secure and one had to ride 'shotgun'. There was also a DR commitment to the aerial dispatch service. As Major Mudd said at the time ***"Our two DRs are stretched rather thin and the two bicycles do not fully cope with the requirement"***.

Photo 4.5 - 103 Signal Squadron COMMCEN (tent) on left and HQ 1 ATF on right (1966).

The shelter telegraph terminal, AN/MGC-17, did not prove to be as useful as was intended. Both telegraph machines and crypto machines had a high fault rate and the confined space did not allow for a technician to repair some equipment while an operator was using other equipment. Also the AN/MGC-17 did not have the capability for the facilities which quickly became necessary so the equipment was dismantled and set up in a tent.

The first two of the many non-standard radio facilities were needed immediately. One was to the US Army advisors at Baria. The other was to alert the casualty evacuation helicopters (Callsign 'Dust Off') at night when they were withdrawn to Vung Tau.

The US procedures and field codes were new to the squadron but were adopted for conformity. Monthly Signal Operating Instructions (SOI) were issued to give the information necessary to operate the various signals facilities in the task force. The US operations code and their numerical/authentication code were also adopted. All radio operators and other users suddenly found they were not using voice procedure as in Signal Training All Arms Pamphlet 7 but instead used ACP 125.

There was much heart burning amongst RA Sigs officers, including the SO Sigs, because call signs, address groups, codes and so on did not change daily, but by order of Commander 1 ATF change only once a week. The argument was that the enemy could not react in any strength in less than a month whilst daily changing call signs, codes etc, reduced simplicity and speed. Within about a year the changes were only made monthly.

Photo 4.6 - 103 Signal Squadron Kitchen at Nui Dat (1966).

The adoption of ACP125 and the US codes had wide ramifications for RA Sigs and other corps, especially for training.

Over the first few months in Nui Dat task force operations were aimed at gaining dominance of the TAOR (Tactical Area of Responsibility) so radio communications were mostly over ranges of only 5 or 6 kilometres, presenting no difficulties to 103 Signal Squadron. A requirement had arisen to retransmit using AN/PRC-25 radios and this worked well except for a high fault rate in the interconnecting cable, a problem that continued a long time.

The first major task force contact occurred near Long Tan on the 18th August 1966. The base at Nui Dat received some 60 mortar rounds in the early hours of the morning and that day and the next, company size patrols of 6 RAR patrolled and searched for the enemy. D Company bumped a force thought to be on its way to attack the base camp. It consisted of a VC battalion, a North Vietnamese battalion and another VC battalion nearby but not in the firefight. The enemy dead totalled 245 whilst D Company 6 RAR suffered 18 dead and 25 wounded. Throughout the battle communications on the task force, 6 RAR and artillery nets were good. Artillery was able to give very close fire support and there was good control over the dispatching and movement of reinforcement for D Company - important contributions to the success of the battle. This action is now known as the Battle of Long Tan and

Vietnam Veterans day is now held on the 18th August each year to commemorate the battle and service of Australian Veterans in South Vietnam. See chapter 5 for details of 547 Signal Troop radio intelligence work before the battle.

Photo 4.7 (left) - Long Tan battle site next morning (19 August 1966).

Photo 4.8 (right) - 105mm field guns and good VHF radio communications helped save D Company, 6 RAR at the Battle of Long Tan.

Settling Down

Nui Dat began to look more like a garrison than a forward field base. Concrete was poured. Tentage was gradually replaced by wood and galvanised iron huts. Spiral 4 was installed, especially to provide remote control lines from the signal centre area to the 103 Signal Squadron radio bunker on top of Nui Dat. AN/GRC-106 medium power HF radios were received for use on the task force telegraph net, although this net was rarely used operationally.

Photo 4.9 (left) - Signalman Reginald Dando operating Ebony Switchboard AN/MTC-7 Shelter (1966).

Photo 4.10 (right) - SB-22 Switchboard.

Task force operations were taking place a little further out and in some more difficult country. Retransmission was more frequently used, often with a detachment on VC

Hill in Vung Tau. Aerial rebroadcast was introduced via a pair of AN/PRC-25 radios fitted in a Cessna 180A fixed wing aircraft of 161 Recce Flight; as an ad hoc procedure it did the job but faulty retransmission cables continued to plague this form of communications. Retransmission capabilities from ground radio improved greatly when the AN/VRC-12 series radios were received later on in 1967 and the air capability was most satisfactorily provided later still with a different radio fitment in the Sioux helicopters. The higher powered transmitter and better receiver of the RT-524 of the AN/VRC-12 equipment also reduced the need for retransmission.

During a cordon and search operation at Hoa Long, between Nui Dat and Baria a few kilometres to the south, it was decided that HQ 1 ATF would deploy a tactical headquarters for the first time. 103 Signal Squadron had only to provide a radio detachment to communicate the short distance to Nui Dat and there were no difficulties. This was the start of a new phase of communications for the squadron, a phase that had been concerning Major Mudd because his squadron was almost fully committed in the base and there was little left to provide for a main task force headquarters away from Nui Dat.

Diagram 4.1 - Communications Operation HAYMAN (Nov 1966).

Early in November 1966, HQ 1 ATF (Main) deployed on Operation HAYMAN to Long Son Island just off the coast to the west of Nui Dat. It was a search and destroy

mission lasting 5 days. Voice and telegraph circuits were provided to HQ AFV, 1 ALSG, II FFV (the US headquarters which operationally controlled 1 ATF) and HQ 1 ATF (Rear) at Nui Dat. Radio relay rear links were provided by a 4 man detachment from 145 Signal Squadron and a 10 man detachment from US 53 Signal Battalion, the latter to II FFV. At HQ 1 ATF (Main) two SB-22/PT switchboards were used but these did not prove as convenient as the larger SB-86/PT used for later deployments. With a small squadron headquarters, kitchen and technical maintenance detachment, 39 all ranks went forward in 8 Chinook helicopter loads, four being required for US 53 Signal Battalion equipment and vehicles. There were no communications difficulties but the operation highlighted the squadron's shortage of telegraph and cipher machines.

Photo 4.11 (left) - Early 103 Signal Squadron more permanent COMMCEN positions (1966).

Photo 4.12 (right) - Vung Tau circuit position - TT-4/TG (Left) and TT-76 (Right) 103 Signal Squadron (1966).

Photo 4.13 (left) - 103 Signal Squadron operator preparing a message (1966).

Photo 4.14 (right) - Part of 103 Signal Squadron Main Distribution Frame (1966).

By December 1966 the installation of a permanent signal centre was well under way. It provided for eight send and receive positions plus two tape preparation positions. Communications facilities of a task force signal squadron were becoming somewhat

removed from the expectations of the planners of the establishment and equipment entitlements of such a squadron.

Even the area switchboard had grown by this time to two SB-86s with a total of 77 locals and trunks.

Photo 4.15 (left) - Switchboard operator Lance Corporal Kevin Chipchase manning dismantled Ebony Switchboard (2 x SB-86's) 103 Signal Squadron (1966).

Photo 4.16 (right) - Rear of Ebony Switchboard (2 x SB-86's) 103 Signal Squadron (1966).

Photo 4.17 - Dismounted AN/MRC-69 Radio Relay Equipment - AN/TRC-24 Radio Set in the centre and the F1830 FDM Multiplexing Equipment on the right - 103 Signal Squadron, Nui Dat (1966).

One set of radio relay and channeling equipment (AN/MRC-69) operated by 145 Signal Squadron was dismantled from the shelter and moved into the equipment

room of the new signal centre building.

Meanwhile the AN/MGC-17 (telegraph) and AN/MTC-7 (switchboard) shelters were set up with sandbagged walls and roof to provide a basic minimum alternative telegraph and telephone facilities.

Photo 4.18 (left) - AN/MGC-17 and AN/MTC-7 sandbagged at the back of the 103 Signal Squadron COMMCEN - Note the line poles (1966).

Photo 4.19 (right) - AN/MGC-17 and AN/MTC-7 sandbagged (bottom right) at the back of the 103 Signal Squadron COMMCEN (1966).

To Sergeant Vincent Good of the task force signal squadron the highlight of his service in South Vietnam was in the first two weeks at Nui Dat. There was only off line cipher and the office needed 3 on duty whilst one slept. He and the other cipher operators were working at their maximum, doing very well the job they were trained to do.

For others such as Lieutenant Bill Laurie, the highlight of service with 103 Signal Squadron came later, around November 1966, when the earlier problems and lack of experience had been overcome. Communications were reliable with alternatives available - now the whole unit was operating on the professional basis for which all ranks had been trained.

104 Signal Squadron

When Major Gerry Lawrence took his first parade of 104 Signal Squadron at Enoggera camp in Brisbane in September 1966. He wondered how he was going to turn the 50 men, some of whom were not suitable for active service, into a full strength, well trained task force signal squadron in 6 months.

Apart from being nearly 100 men short, their personal equipment and clothing was not of the type used on active service; they did not even have some of the current weapons. Unit equipment for communications training was not in all cases the same

as that being used in 1 ATF. 104 Signal Squadron did however have the benefit of 103 Signal Squadron monthly reports.

In the end it was done and on 16th April 1967 preparation completed, the advance party of 14 all ranks moved to Brisbane's Eagle Farm airport where they joined other units' advance parties and boarded a Qantas DC6 for Darwin. This was not an occasion of many relatives' farewelling at quaysides and streamers breaking as a ship sails away (although many did go to Vietnam on the troop carrier HMAS Sydney). Brisbane was not the home of many of the men and they had made their farewells during pre-embarkation leave at their hometowns.

After staying overnight at Darwin the parties were loaded into RAAF C130 Hercules transports which flew direct to Vung Tau. Their first contact with the theatre was to be greeted by cans of soft drink coming out of 44 gallon drums of ice. The 104 Signal Squadron party then boarded a 35 Squadron RAAF Caribou for the short flight to Nui Dat. A very happy Major Mudd greeted a very tired Major Lawrence and drove him in one of the few serviceable squadron vehicles to the task force signals squadron lines opposite the task force command post.

The main body of 104 Signal Squadron began arriving in Nui Dat on 26th April 1967 and the remainder of the squadron with Second in Command Captain Ren Hinton arrived by 3rd May 1967.

Reports omit what quickly becomes routine. 104 Signal Squadron was not really prepared for the permanent air of the whole base, nor was it prepared for the constant gunfire - outgoing - especially from the US 175mm Howitzers, only a couple of hundred metres from the signals area and invariably firing overhead which violently rattled the Kingstrand huts after the deafening sound. But they quickly adapted and took over from 103 Signal Squadron.

As with 110 Signal Squadron who replaced 145 Signal Squadron about the same time, the communications which 104 Signal Squadron provided suffered from almost all ranks being replaced at the one time so that there was a lack of background and experience to cope sufficiently quickly with some problems. Fortunately task force operations imposed no special strains on 104 Signal Squadron at the time, but it was the last occasion that the task force signal squadron was relieved as a unit.

The death knell to HF radio in the task force was rung in May 1967 when the telegraph net was closed. The AN/PRC-25 radios had proved to be so reliable that an alternative net to the task force voice command net was not required and units did not want to be slowed down by the telegraph detachment. Also, the nature of operations was such that there was almost no administrative traffic.

Apart from closing the task force telegraph net, 104 Signal Squadron picked up where 103 Signal Squadron had finished and continued construction of huts, rebuilt defences. Installed additional cable for new and alternative circuits, especially the

remotes to the Nui Dat feature, continued wiring in the signal centre and continued complaints about worn out or unreliable equipment particularly telegraph machines, cipher machines, generators and the SB-86/PT switchboards. Dust caused excessive wear in the telegraph machines (at Vung Tau, 110 Signal Squadron had a similar problem with sand) and heat caused a high fault rate on cipher machines; air-conditioning the signal centre finally overcame these problems. The generators were by no means new when 103 Signal Squadron brought them to the theatre and the continuous use just wore them out. The unsuitability of the SB-86/PT was overcome by replacement with a 200 line World War II TC-10 switchboard, resurrected from 133 Signal Squadron (base signal park in Penrith) - another one was installed at Vung Tau.

Photo 4.20 - TC-10 (Ebony) manned by 104 Signal Squadron Switchboard operators at Nui Dat (1967).

It also kept task force communications operational with the main headquarters moving out several times to greater distances than before although generally operations remained within Phuoc Tuy Province. Seldom was a unit of 1 ATF more than 40 kilometres away from the Nui Dat base so that VHF radio and radio relay coped with all needs.

The squadron received its long fought for theatre increment bringing its total strength to 150. With the detachment from 110 Signal Squadron, the detachment for US 53 Signal Battalion, 547 Signal Troop (EW) and the detachment of 152 Signal Squadron (SAS), over 200 all ranks were now engaged in direct signals support to the task force.

This was a time of consolidation and many improvements were introduced but the task force and its signal squadron were becoming entrenched in a substantially fixed system of communications. For example in mid 1967 there were 32 rear links operating out of the task force. However, mobility in field communications was retained and this enabled the outnumbered task force to conduct operations away from the base leaving it defended mainly by administrative personnel; the highly reliable field communications would allow immediate reaction to a threat to the base.

104 Signal Squadron in July 1967 had its first soldier WIA, when Signaller Reginald Armstrong, a radio operator on LO duty with the US Army 1 Bde HQ at FSPB Bill, near Thia Tich, was hit by fragments from a tree burst during a mortar attack. In August 1967 Corporal D. J. Donnelly was accidentally killed at Nui Dat while cleaning his F1 Sub Machine Gun.

139 Signal Squadron

Back in Enoggera 139 Signal Squadron had been formed as the squadron to support 6 Task Force and it then became the main source of replacement for 104 Signal Squadron. Time was a critical factor for 139 Signal Squadron especially where National Servicemen were concerned since they had to do recruit training and corps training, which left little time for unit training, if they were to complete a 12 months' tour in Vietnam.

CHAPTER 5 – SPECIALIST SIGNALS

PART 1 - 547 SIGNAL TROOP

Preparations

547 Signal Troop's involvement in Vietnam began in March of 1966 when Army Headquarters proposed that the troop be allocated in direct support of the 1 ATF. The Task Force was due to assume the responsibility for Phuoc Tuy Province in May of 1966. The Troop was initially only established at half strength of fifteen men. Captain Trevor Richards was appointed to command the Troop. This was an appropriate appointment as Captain Richards had been involved with a similar unit during the Borneo Campaign.

The need to deploy the troop in Vietnam was largely due to the appreciation of two officers, Lieutenant Colonel Ken Whyte and Major Colin Cattnach. Major Cattnach spearheaded the Troop's deployment with a visit to Vietnam. Whilst in Vietnam he made contact with local Australian and Allied authorities and did much to ensure that the unit would be committed to a solid role and enthusiasm was reflected in the high standard of commitment and tasking which he set for the Troop.

7 Signal Regiment

547 Signal Troop was a sub unit of 7 Signal Regiment and soldiers were taken from the Regiment's outposts throughout Australia. 7 Signal Regiment would feed replacement specialist Electronic Warfare (EW) personnel to 547 Signal Troop during its deployment in Vietnam.

Deployment

In a frenzied round of visits between 12th and 20th May 1966 the details were settled for the troop's deployment. The troop was to take its own weapons, stores and vehicles but would receive its maintenance and administrative support from 103 Signal Squadron which at that time was serving as the Task Force Signal Squadron. In the subsequent years a strong bond of friendship was built between these two units and 103 Signal Squadron's replacement unit, 104 Signal Squadron.

On 21st May 1966 the unit's advance party left Borneo Barracks (7 Signal Regiment) for embarkation at Sydney on HMAS Sydney. On 8th June 1966 landing craft of HMAS Sydney deposited the advance party of 547 Signal Troop on the beach at Vung Tau.

The main party of the Troop was moved by air from Sydney to Vung Tau via Saigon. On 14th June 1966 they met up with the advance party and the following day headed

off to Nui Dat. There, the OC of 103 Signal Squadron, Major Mudd allocated the Troop a position opposite the Task Force Headquarters, fairly close to where the communications centre was later to be built.

Operations commenced on 24th June 1966 and were continuous for the next five and a half years.

Operations

Operationally, the troop was committed to a role of intermediary between allied 'Radio Research Units' and the Task Force Headquarters. This was implemented quickly but with a few teething problems. Within a fortnight of arrival at Nui Dat, independent research began.

Photo 5-1.1 – 547 Sig Tp Set Room (1969).

Radio equipment provided some problems as it had suffered a rough passage and was not handling the local heat very well. Repairs had to be effected under adverse conditions, without the services of a technician.

Highly classified for many years is the radio work of 547 Signal Troop in Vietnam. For example in the lead up to the Battle of Long Tan. Two weeks before the Battle,

547 identified the radio callsign of 275 (VC) Main Force Regiment, a fresh unit to Phuoc Tuy Province and under the control of HQ 5 (VC) Division. On the same day the Troop fixed the location of 275 Regiment's transmitter by radio direction finding. That, in the Troops opinion, should have stirred the possums - or mongooses - at HQ 1 ATF. It caused hardly a ripple.

One of the problems was the little understanding, by the staff of HQ 1 ATF of the importance of information provided by 547 Signal Troop at the time. Also only four people outside the Troop at Nui Dat, were authorised to be told the sources of 547's information (The Commander, Operations Officer and the G2 plus G3 Int) by the Australian Department of Defence. US intelligence came in reams, but often it was not parochial enough for the Task Force, so most reliance was placed on reports from Australian sources, especially patrols. Also the Task Force HQ treated intelligence from the South Vietnamese Army and Police as suspect due to the conflicting nature of their reports.

Diagram 5-1.1 - Movement of 275 Regiments transmitter towards Nui Dat as reported by 547 Signal Troop (29 Jul 1966 to 14 Aug 1966).

On the 29th July 1966, 547 reported a considerable increase in radio traffic from the

east, which suggested to the Troop OC (Captain Trevor Richards) and his analysts that something significant was in the offing. On the same day, the 547 operators located the transmitter of 275 Regiment a couple of kilometres north of Xuyen Moc, it then approached the Nui Dat base in steady deliberate stages, as though moving tactically, taking sixteen days to cover the seventeen kilometres from there to the area of Nui Dat 2 (near Long Tan), with 547 operators locating the transmitter twelve more times along the way from the 2 to 14 August.

On the 18th August 1966, D Company, 6 RAR, near Long Tan fought a major battle, which is now known as the 'Battle of Long Tan' with one to two thousand enemy.

Photo 5-1.2 (left) - Huey's doing resupply mission.

Photo 5-1.3 (right) - SSgt Bill Irwin (left), Capt Trevor Richards (centre) and SSgt Jim Rayner at Christmas, Nui Dat (1966).

At 1700 hours as the besieged D Company were requesting a desperate resupply of ammunition by helicopter, another significant event occurred. The Commander, at last, called the OC of 547 Signal Troop to his side and asked for his analysis of the enemy attacking D Company.

Richards had no problem responding in detail, relieved that his team efforts had, at last, won recognition. From that day the Australian 'Agency' charged with passing on US information quietly became an agency producing and passing on its own information back to US authorities, as well as the Task Force.

It was not until February 1967 that the Troop welcomed its first technician. With the close liaison established with the HQ 1 ATF, it became apparent that the Troop could perform more than an intermediary role. In fact, some agencies soon began to request more of the Troop's results and soon became dependent on the Troop as a source of information. This fact was acknowledged in a letter of commendation from the Troops Operational Command to the highest authority concerned.

Early in 1967, the Troop workload was increased with the introduction of aerial experiments. Operators, who seldom ascended more than twenty feet up a mast, now found themselves being hurled around the sky in a Cessna 180A belonging to 161 Independent Reconnaissance Flight. Early tests consisted of a Receiver with a

length of 'copper' wire trailing out of the aircraft. This wire (aerial) was wound in/out of the aircraft on a 'fishing reel'. Meanwhile, purpose built equipment was being designed and tested at 'Weapons Research Establishment' in Australia. The equipment was simple, but very effective and accurate. Once operational, the skills of the 161 Independent Reconnaissance Flight pilots contributed greatly to the accuracy of and credence placed upon the end results attained by the Troop.

Photo 5-1.4 (left) - SSgt Bill Irwin (left) and Sgt Sammy Rogers with unit sign at Nui Dat (1968).

Photo 5-1.5 (right) - Sig Bugsy Harper at Nui Dat (1967).

ARDF

The Troop commenced Operational Airborne Radio Direction Finding (ARDF) missions in August 1967 with equipment mounted in the 161 Independent Reconnaissance Cessna 180A aircraft. Allied visitors to the Troop were surprised by its capabilities and many Senior Officers and boffins flew missions in the aircraft to see the gear in operation.

Photo 5-1.6 - Cessna 180A with ARDF equipment at Nui Dat - Note antenna pod in the up position.

In this period Corporal Dick Schafer of 547 Signal Troop earned fame as an ARDF operator. His first ARDF incident was simply a matter of running out of gas in the Cessna 180A. The pilot just managed to glide home to Nui Dat (Luscombe Field), to Dick's joy!

The second incident was more serious. His Cessna 180A engine stopped and had to force land into a paddy field twenty kilometres north of Nui Dat near Route 2 around Courtenay's Plantation.

Photo 5-1.7 - Cessna 180A fitted with ARDF equipment.

After crash landing Dick scrambled from the broken aircraft to face an encircling patrol dressed in black. The pilot (Lieutenant Steve Tizzard) and Dick prepared for a desperate stand. The tallest member of the patrol put his hands into the air shouting ***"Don't shoot, I'm an American adviser"***. To this day Dick and the pilot are not sure whether they or the adviser enjoyed the greater relief.

Dick, the pilot and their highly classified equipment were extracted under the protection of Helicopter Gunships and a SAS protection patrol, which arrived within minutes of the forced landing.

Subsequently it was discovered that the aircraft came to a stop on the EW antenna pod after its undercarriage collapsed in the crash landing. The EW equipment was undamaged in the incident however the aircraft was a write-off because it was dropped in the recovery operation.

Upgraded ARDF

Early 1970 saw the installation of an upgraded piece of equipment into the 161 Independent Reconnaissance Flights new Pilatus Porter aircraft. The new equipment proved to be a joy to operate and a vast improvement on the older models, much to the delight of the operators and technicians.

An example of the number of hours flown and sorties carried out per month in support of 547 Signal Troop by 161 Independent Reconnaissance Flight in 1971 is as follows:

June 1971	181 hours	100 sorties
July 1971	171 hours	93 sorties
November 1971	312 hours	156 sorties
December 1971	84 hours	41 sorties

Photo 5-1.8 - Pilatus Porter at Nui Dat.

Photo 5-1.9 - Australian Designed Pilatus Porter ARDF equipment.

The Cell

October 1968 also saw the arrival of more experimental Direction Finding (DF) single station locator equipment. The equipment was to be located within the Nui Dat perimeter but away from the Troop's main operational base. The equipment was called the 'Cell' and was based on the World War II German 'Wullenweber' aerial system which used four aerials in a circle. The single station locator pinpointed the source of the radio wave by measuring the phased time and angle difference between two incoming radio waves striking the antennas in the circle and calculating the angle of deflection from the ionosphere. The Cell was a source of interest to many allied units. Streams of visitors came, and once the complexities of its functions were mastered and the operators and technicians gained confidence, the project went on to produce valuable results. This single station location method developed by Australia is now used world wide in sophisticated HF DF Systems.

Photo 5-1.10 - The Cell in final testing before deployment to Vietnam. From Left Captain John Duncan, Warrant Officer Class One Jack Hooker and Corporal John Peters (1968).

Forward Deployments

With the Task Force Headquarters deploying forward in operations, it was also necessary to improve 547 Signal Troop's representation at the forward HQ. An Armoured Command Vehicle (ACV) '84 Delta' was allocated to the Troop and was fitted and wired for the necessary communications equipment. By working on the Troops own links, the Troop representative was able to give rapid replies to staff questions.

Re-location to Vung Tau

News of the Australian withdrawal came in August 1971. The Troop re-deployed to Vung Tau on 6th October, with no loss of circuit time. On 17th October 1971, the rear echelon joined the rest of the Troop at Vung Tau. They had remained at Nui Dat, with the ACV, and a two man rear party. 547 Signal Troop was the last vehicle to leave Nui Dat. On 13th December 1971, 547 Signal Troop closed operations in Vung

Tau. The flying team ceased operations at 1200hrs and the Communications Centre at 1800hrs. On 23rd December 1971, in the early hours of the morning, 547 Signal Troop boarded the buses for the airport. At 1000hrs, 23rd December, the Troop departed Vietnam.

Photo 5-1.11 - 547 Signal Troop compound gate at Nui Dat (1971).

Photo 5-1.12 (left) - 547 Signal Troop setting up at Vung Tau (1971).

Photo 5-1.13 (right) - 547 Signal Troop SIGCEN at Vung Tau (1971).

Footnote: On Wednesday 9th February 1972, 7 Signal Regiment at Borneo Barracks (Cabralah, Queensland) held a special parade to welcome 547 Signal Troop home. Major Herb O'Flynn, the last Officer to Command the Troop, then disbanded the Troop and returned the personnel to 7 Signal Regiment.

CHAPTER 5 – SPECIALIST SIGNALS

PART 2 – DETACHMENT 152 SIGNAL SQUADRON

Introduction

Members of the Royal Australian Corps of Signals (RA Sigs) have a long history of involvement with Special Forces because of the critical role good communications plays in the success of any special force operations. With the forming of the 1st Special Air Service (SAS) Company in 1957, Corps members were sourced along with other specialist skills within the Army to help develop the SAS in Australia. The Australian SAS was modeled on the British SAS and the company included a Signal Platoon as part of its establishment.

In September 1964 the SAS Regiment was formed consisting of a Regimental Headquarter, two SAS Squadrons and a Base Squadron. In April 1965 a third SAS Squadron was approved. The first operational deployment was 1 SAS Squadron to Borneo in February 1965, which included a small SAS signals element. In 1966, 2 SAS Squadron replaced 1 SAS Squadron in Borneo. Borneo played an important role for the Regiment and developed its communication skills for its later squadron deployments to South Vietnam - it enabled the SAS to overcome communications weakness in the use of ground waves, morse code and One Time Letter Pad (OTLP) codes.

On the 31 August 1966, the RA Sigs component of the SAS Regiment was expanded to become 152 Signal Squadron, with Captain Ross Bishop as its first commander.

Deployment to South Vietnam

In March 1966 the Prime Minister, Harold Holt, announced the increased commitment to South Vietnam of an Australian Task Force. Included in this commitment was a SAS Squadron.

Unlike other Australian Army personnel, SAS members did not do jungle warfare training at Canungra but did special training exercises in New Guinea. The first Exercise Traim Nau in April/May 1966 prepared 3 SAS Squadron and its Signal Troop for service in South Vietnam.

The main body of 3 SAS Squadron flew from Perth to Saigon on a chartered Qantas Boeing 707 on the 15 June 1966. Included in the Squadron were members of 152 Signal Squadron as a 3 SAS Squadron Signal Troop, commanded by Sergeant Daryl Croucher. From Saigon the SAS Squadron arrived in Nui Dat via Vung Tau on the 17 June 1966.

Setting Up at Nui Dat

The SAS Squadron on arrival at Nui Dat was allocated positions on the Nui Dat perimeter facing Hoa Long but after a few weeks were moved to an area near 103 Sig Sqn. After digging in and a few days to acclimatize, SAS patrols commenced using vintage A510 Radio Sets until batteries and crystals were located for the AN/PRC-64 Radio Sets. Deficiencies in the signals equipment restricted communications, which included shortages of AN/PRC-64 batteries and AN/URC-10 Radio Sets, and of all things no OTLP codes.

A visit to US 5th Special Forces Group at Nha Trang by the OC, Major John Murphy helped the SAS Squadron when AN/PRC-64 batteries and three AN/PRC-47 Radio Sets were obtained.

SAS did not move onto Nui Dat Hill until 3 SAS Squadron was replaced by 1 SAS Squadron and its detachment of RA Sigs members from 152 Signal Squadron in March 1967. From that time, the task force soldiers affectionately knew Nui Dat Hill as SAS Hill.

SAS Communications

Photo 5-2.1 (left) – AN/PRC-64 HF Radio Set.

Photo 5-2.2 (right) - R-391/URR HF Receiver.

Because of the nature of SAS patrols, the usual means of communication from a patrol to the base at Nui Dat was HF radio. The highly reliable, lightweight AN/PRC-64 radio used only in the CW mode was normally the patrol equipment operating to an R-391/URR receiver and AN/PRC-47 radio at the base. Patrols operating close to Nui Dat also used the VHF AN/PRC-25 Radio Set however it took up a lot of pack space and rations plus water had to be split up amongst the other patrol members. An adaptor was sometimes fitted to the AN/PRC-25 radios, which enable the patrol signaller to transmit to base in morse code while the base station could reply in

voice. Many of the SAS patrols included 152 Signal Squadron members, normally of course, in the patrol signaller role.

Photo 5-2.3 – L-R Pte Geoffery Hannaford, **Sig Doug Abbott**, Sgt Ronald Gilchrist, L/Cpl Allan (Jim) Gallegos and Pte Neville (Harry) Rossiter preparing for a Patrol in 1970.

Photo 5-2.4 – SAS COMM-CEN - L-R L/Cpl Robert Taylor, Sig John Dodd, Sig Wayne Mason, Sig Eric Barnett and Sig Kym Paull. The first four Sigs are on radio watch for SAS Patrols and the last is manning the unit switchboard 'Envoy' (1971).

The patrol normally had two routine signal schedules in code using OTLP to keep each day, and these were at different times for each patrol out on operations. This allowed the base station manned by the SAS 152 Signal Squadron operators at Nui Dat to deal with only one or two patrols at any one time and provided for an orderly

flow of traffic. The SAS 152 Signal Squadron operators manned the base station COMMEN 24 hours a day for scheduled and non-scheduled traffic while ever SAS patrols were deployed.

Communications to the base station at Nui Dat were often poor as the patrol, generally, was unable to erect more than a low random length of wire as an antenna for the small HF Radio, so communication difficulties were experienced in the more remote areas of Phuoc Tuy Province. It was not unusual for the first or subsequent attempts to receive no response, requiring a reorientation of the antenna or even a complete change of location by the patrol to a new layup position (LUP).

During 1968 and later there were many experiments conducted to improve communications for SAS patrols. One was the use of a tethered balloon, which could lift two AN/PRC-25 radios in a retransmission configuration. A special "on loan" high angle log periodic antenna (LPH-17) was installed in 1968 on Nui Dat Hill for SAS HF communications. In addition two man detachments of SAS signals were deployed late in 1967 and most of 1968 to monitor and relay patrol communications back to Nui Dat. Detachments were located with the US Advisors at Xuyen Moc and Duc Thanh plus occasionally on VC Hill depending on the location of the patrols. The signal detachments would be for 2 weeks or until no longer needed.

**Photo 5-2.5 (left) – Preparing the SAS VHF Retransmission Balloon at Nui Dat Hill

L-R Sgt David Lowson and 2Lt Peter Fitzpatrick (1968).**

Long Range Reconnaissance Patrol Wing

Many SAS members including Signals were involved in training and patrolling with ARVN soldiers from the Long Range Reconnaissance Patrol (LRRP) Wing at Van Kiep, near Baria. Members of the AATTW mostly ex SAS Warrant Officers ran the wing and SAS plus signal techniques were taught. Many of the Vietnamese Chieu Hoi students end up as 'Kit Carson Scouts' – forward scouts for American patrols after their training was completed.

Photo 5-2.7 – Sig Gary McDonald in front of E Troop after returning from a Patrol (1971).

Summary

The SAS Squadron was a vital element in the intelligence gathering process for the task force and worked on the intelligences gained by 547 Signal Troop (See Part 1 of

this chapter) for the commander. The specialised communications available to SAS through its detachment of 152 Signal Squadron enabled it to function in a most unorthodox and sometimes almost incredible fashion, patrols being inserted and extracted in the midst of enemy units, and communicating information as they acquired it. It is good reason the VC came to call them 'Ma Rung'.

CHAPTER 5 – SPECIALIST SIGNALS

PART 3 – 32 SMALL SHIP SQUADRON

Introduction

In 1959 the Australian Army purchased four Landing Ship Medium (LSM) from the US Navy in Japan. These vessels were veterans of the Pacific Campaigns in World War Two and the Korea War. They were 62 metres long, with a beam of 10.4 metres and could carry up to 306 tons, including four Centurion Tanks (4 x 52 tons) at a speed of 11-12 knots, with 14 knots max.

They served extensively in New Guinea and the South West Pacific and two of them served in Borneo during the confrontation with Indonesia in 1964. The unit, 32 Small Ship Squadron, was disbanded in early 1972 with the Royal Australian Navy (RAN) to be responsible for all seagoing activities of the Defence Force since.

32 Small Ship Squadron was a unit of the Royal Australian Engineers (RAE) and had five ships, each named after famous Australian generals, as follows:

AV1353 "Harry Chauvel" (Formerly USS LSM-319)

AV1354 "Brudenell White" (Formerly USS LSM-477)

AV1355 "Vernon Sturdee" (Formerly USS LSM-315)

AV1356 "Clive Steele" (Formerly USS LSM-547)

AS3051 "John Monash" (Formerly MV Marra - 1400 ton Cargo ship)

Australian Army held a LSM vessel on station in Vietnam during the Australian involvement in support of both Australian and US forces operating mainly between Saigon, Vung Tau and Cam Ranh Bay. They also visited the coastal ports of Nha Trang, Phan Rang, Qui Nhon and Da Nang plus the Mekong Delta ports of My Tho, Can Tho and Bin Thuy.

Each LSM carried a crew of 4 Officers and 47 other ranks, when on operations in Vietnam. While most of the manning was RAE, other Corps members were also part of each crew, including medical, signals and ordnance. In Vietnam, the ships were fitted with 40mm bofors gun and several machine guns for protection.

All LSM ships served in Vietnam with the "John Monash" undertaking the "Shuttle run" between Australia and Vietnam.

32 Small Ship Squadron Headquarter (HQ) never left Australia and was located in Sydney. Once the ships sailed from their Sydney Base, operational control was RAN via the Commander Australian Fleet (COMAUSTFLT). In Vietnam waters the tasking was HQ Australian Vietnam Force (AFV) via HQ 1st Australian Logistics Support Group (1ALSG).

Photo 5-3.1 - LSM Harry Chauvel unloads vehicles, OP Kenmore (1967).

Enemy Action

The only Australian LSM to sustain battle damage during the Vietnam War was the Clive Steele, attacked in the Mekong Delta in transit between Can Tho to Vung Tau on the 5 January 1969. The ship was hit by three B40 RPG rockets but lucky received no casualties. However the water distilling plant and the refrigeration system were damaged.

All the Australian LSMs came under sniper and sporadic fire from time to time.

Ship Conditions

The LSMs were built for short-term use landing supplies in the Pacific during World War II. As such the facilities for the crew were extremely basic. All accommodation spaces were below deck with poor ventilation with several sections of three tiered bunks in cramped and crowded conditions giving no room to roll over. Above the bunks were pipes lagged with asbestos, which would rain down on the sleeper during heavy seas, covering him in white dust. Toilet facilities were an open tray with a row of seats and no privacy.

The Forrard Mess was the eating, meeting and relaxing place in each LSM.

Dennis Wynne commented;

"Sometimes in inclement weather, anyone who had been up in the galley above the Forrard Mess run the risk of slipping on the ladder down to the mess deck and having a nasty fall. Needless to say the space immediately at the bottom of the ladder was always vacant in times of bad weather".

The flat-bottomed ships did not travel well in rough seas

When used during the Vietnam War, the LSMs were already old ships in need of constant maintenance. On the final trip of the *Clive Steele* in 1970 one of the bow doors fell off whilst on the way to Vietnam. The vessel had to return to Sydney for repairs before taking up station in Vietnam. One veteran remembers the skipper putting his hand on the side of the ship and it went straight through the signals shaft.

The ships would deliver a wide assortment of supplies, from tanks, drums of fuel, ammunition to beer. For many areas in Vietnam, the LSMs were the only means of transporting heavy equipment to the troops as the roads and bridges were not suitable. The cargo hull was open and exposed to the elements. There were frequent problems with the cargo shifting in heavy seas. On the initial deployment of the *Clive Steele* to Vietnam in Jan 1968, it had armoured bridge layers and other armoured type cargo lashed down in the well deck. Whilst transiting the South China Sea two days out of Vung Tau in Force 6 weather, some of the lashings broke at 2am in the morning.

Dennis Wynne remembered a couple of the seaman, Sapper Richardson and others went out onto the wet and slippery deck to re-lash the vehicles. A tremendous feat of bravery and skill was displayed by the crew members involved, as any damage by the unsecured vehicles could have been disastrous to the vessel and its crew.

The trips would vary in length. A trip from Vung Tau to Saigon would take a few hours whereas Vung Tau to the Mekong Delta would take 14 hours. All the time they were up river or in the Delta, the crew were at action stations.

Duties were varied among the small crew. Some, such as engineers, worked in shifts of four hours on eight hours off. However the maintenance requirements were high and it was not unusual that engineers and others to worked very long days. Other crew were day workers who worked a normal day and they would help with other jobs as needed. However with a small crew duties were flexible and would change whether at sea or in port. While in port or in heavy seas all crew were needed, often for extended periods.

Food was obtained from a variety of sources, generally from American or Australian suppliers. Fresh local food was also obtained from the Vietnamese, especially when away from Vung Tau.

The LSMs had a Kleinschmidt water distillation unit that would distil about 100 gallons of potable water per day. However when the unit was running it would cause the temperature in the engine room to increase to extremely uncomfortable levels, so was only used on longer trips out to sea. When in harbour fresh water was pumped on board normally from Australian or American organisations but sometimes it was obtained from local Vietnamese and then the crew would add buckets of chlorine to the supply.

RASigs Involvement

Photo 5-3.2 – Sgt Alva Knight (RASigs) using an AN/PRC-25 Radio Set to communicate with Army units from the AV Clive Steele in Vietnamese waters (1966).

Normally two or three Royal Australian Corp of Signals (RASigs) personnel were part of each ship's crew maintaining a radio watch 24 hours/7 days a week. Communication staff were responsible for transmitting and receiving by AM voice, messages/telex normally in morse code and delivering to designated personnel on the ship. Also receiving and displaying weather reports on the Ship's Notice Board. The Radio Operators were some of the most experienced in RASigs. Many also served with other RASigs units in Vietnam.

Communication equipment used on the Ships was standard RAN, so on the job training was required to learn its operation. Lots of on the job training was required including some technical tasks, as technical assistance was not available on the ship for most of the communication equipment.

110 Sig Sqn provided technical assistance with tactical radio equipment installation and repairs when the ships were at Vung Tau.

The Ship maintained communications with HQ 32 Small Ship Squadron at Woolwich Dock in Sydney. RASigs members built a Base Station which was manned by the signalmen not at sea, under the watchful eye of the senior RASigs member, WO2 Nolan Astill.

Ship Communications

Once at sea the ship operated on the RAN communication system using morse code at a speed of 18wpm or better and the ships Navy callsigns were as follows:

AV1353 " Harry Chauvel"	VKFX
AV1354 "Brudenell White"	VKFY
AV1355 "Vernon Sturdee"	VKFD
AV1356 "Clive Steele"	VKFQ
AS3051 "John Monash"	VKPB

All ships in Australian Defence Force (ADF) were under COMAUSTFLT and all communications to and from each ship were through the RAN, United States Navy (USN) and Commonwealth Navy's ship/shore communication stations.

Key communications stations used during the Vietnam War period were:

HMAS Harman, Canberra (RAN)
HMAS Coonawarra, Darwin (RAN)
Kranji W/T, Singapore (RN)
Portishead Radio, England (RN)
Vancouver Radio, Canada (RCN)
Wellington Radio, New Zealand (RNZN)
North West Cape, Western Australia (USN)
Yokuska, Japan (USN)

Interesting most ship/shore stations operated duplex continuous wave (CW) however; the USN stations operated simplex CW only.

Offline COMSEC equipment TSEC/KL-7 (Adonis) was used in the first ship deployments but was replaced with the BID/60 (Singlet) to encrypt and decrypt classified messages.

When in Vietnam waters the vessels were also fixed with Tactical HF and VHF equipment's so they could communicate on the different radio nets used by military units and port facilities.

Photo 5-3.3 – LR Sgt Norm Harris and Cpl Dennis Wynne in the Radio Shack AV1356 Clive Steele in Vietnam 1968. Note: Radio Set AN/GRC-106 (Bottom Left) purchased from US Army for carton of VB Beer (1968).

On arrival in Vietnam vessels remained under COMAUSTFLT but Vietnam tasking was passed to local Army Command. Which was HQ AFV but day to day tasking was through HQ 1st ALSG in Vung Tau. The *Clive Steele* in 1968 was taken into the USN Landing Ship Tank (LST) Squadron, as a flotilla member, for the period of its stay in Vietnam.

Once in Vietnam the vessels remained on the ship/shore system and the following systems:

1. Communications guard on the Military Sea Transportation Service (MSTS) Command and Control Net which all military vessels took station on. This Net was on 8MHz and Dennis Wynne remembers an interesting incident on the *Clive Steele*;

"The Clive Steele had departed Vung Tau for the Delta and beached at Can Tho. The operators on the Clive Steele were preparing for the nightly CW schedule to HMAS Harman, when a very distinctly sounding Aussie voice called the USS LST 825 Hickman County, which was on transit to Da Nang. Operators monitoring the net on the Clive Steele listened whilst the "voice" sounded the USS Hickman County operator, who incidentally knew the operators on the Clive Steele very well and both vessels had been side by side in Vung Tau just 8 hours previous. A couple of judicious questions to the "voice" very quickly caused him to disappear. So we had Imitative Communications Deception (ICD) in Vietnam to deal with. A few other attempts at ICD were made over the tour of duty of the Clive Steele on the MSTS Net and all handled well until no further incidents were attempted."

2. On departure from the Vietnam Home Port (Vung Tau) the ship maintained a twice daily HF Voice schedule back to 110 Sqn Sqn, Vung Tau. This circuit was for the passage of traffic from HQ 1st ALSG to the ship. After some teething problems the links went well.
3. Maintain a "Guard" on the Defence VHF Net of each area that the ship passed or visited.

Summary

Signal members who served with the 32 Small Ship Squadron all became experienced ship Radio Operators that adapted to ships life, working both with the RAN and Army units in Vietnamese waters, without much support from RASigs. Many would go on to serve in other RASigs roles in the Vietnam War but would always see their service with 32 Small Ship Squadron, as a highlight in their war service.

Sadly members of the LSMs crews including the RASigs personal were exposed to poor environmental living conditions including, water, ventilation, heat, diesel fumes, cigarette smoke, asbestos, Agent Orange and other chemicals. This has resulted in the crews in later life having poor mortality (death) and morbidity (illness) rates. RASigs manning of RAE ships in Vietnamese waters is attached.

Notes:

1. Some crew members show a break in service because their vessel sailed outside the designated war zone, usually to Malaya or Singapore.
2. Some vessels remained in the designated war zone while replacement crews were flown in.
3. List of RASigs members may have missing details and names. If you have any corrections or additional information please contact the author by email pronto@au104.org.

CHAPTER 5 – SPECIALIST SIGNALS

PART 4 – AUSTRALIAN ARMY TRAINING TEAM VIETNAM

List of Abbreviations

1ATF	1 st Australian Task Force
AATTV	Australian Army Training Team Vietnam
ARVN	Army of the Republic of Vietnam (South Vietnamese Regular Army)
AWM	Australian War Memorial (Canberra)
DMZ	Demilitarised Zone (between North and South Vietnam)
DSA	District Senior Adviser
FANK	Forces Armées Nationales Khmer (Cambodia Army)
JWTC	Jungle Warfare Training Centre (Phuoc Tuy Province)
LRRP	Long Range Reconnaissance Patrol (also known as LRP)
MACV	Military Assistance Command, Vietnam
MATT	Mobile Advisory Training Team (Australian forces)
MAT	Mobile Advisory Team (American forces)
MBE	Member of the British Empire (Honour)
MSF	Mobile Strike Force (Mike Force)
Mid	Mentioned in Despatches (Honour)
NOTT	Night Operations Training Team
NVA	North Vietnamese Army
PF	Popular Force (formerly Self Defence Corps)
USCIA	United States Central Intelligence Agency
USSF	United States Special Forces
RD	Revolutionary Development (Cadre Force)
RF	Regional Force
RVN	Republic of Vietnam (South Vietnam)
SFG	Special Forces Group
SFGA	Special Forces Group Airborne
TOC	Tactical Operation Centre (Command Post)
USA	United States of America
WO1	Warrant Officer Class One (Australian Army)
WO2	Warrant Officer Class Two (Australian Army)

Introduction¹

The Commander of the Australian Army Training Team Vietnam (AATTV), Colonel Serong, arrived in Saigon, South Vietnam, on 31 July 1962. The 29 officers and senior NCOs (warrant officers/sergeants) that made up “The Team” arrived in Saigon a few days later on 3 August 1962. This team included Capt Barry Tinkler from the Royal Australian Corps of Signals (RASigs). The men did not have weapons but held visas for the Philippines if evacuated wounded. The American dollars in their pockets had been obtained from an Indian moneylender in Singapore’s old Change Alley, a consequence of the Australian Army’s ignorance that the greenback was South Vietnam’s unofficial currency.

Photo 5-4.1 - First members of AATTV arriving in South Vietnam. L-R Maj Fitzpatrick, Capt George, WO2 Perkins, WO2 Quee, Lt Gollings, Capt Barry Tinkler and Lt Col Mann. Source: AWM P01011.004.

The AATTV was sent to South Vietnam in a training and advisory capacity, as part of the US Military Assistance Command Vietnam (MACV). Members served 12 to 18-month tours of duty. All were volunteers who had to attend and pass the Advisors Course at the Army’s Jungle Training Centre at Canungra in Southeast Queensland. They were sent to South Vietnam singly or in drafts, as the unit did not exist outside South Vietnam. Due to the isolation and location of many of the US Special Forces camps, the US Military provided the Australians with the same administration and logistics as their own advisors. This included weapons, clothing, etc. They would also use American doctrines and techniques, so as not to confuse the Vietnamese Forces they worked with.

AATTV members operated with the South Vietnamese Army (ARVN), Montagnards, Territorial Forces (Regional Force and Popular Force), Mobile Strike

(Mike) Forces, and other local units. Attached to units or battalions as trainers, advisers, and occasionally leaders. Team members usually worked in the field, accompanying units on operations. They worked with various groups from the United States, such as the US Special Forces (USSF) and the US Central Intelligence Agency (USCIA), and under the auspices of the already well-established US Army Advisory system, throughout South Vietnam.

Map 5-4 - South Vietnam with Military Corps 1962 to 1972. Source: Internet

The AATTV was increased to 73 personnel in September 1964, and then to 112 in June 1965. The Team reached peak strength of 217 members in November 1970. As part of an overall reduction of the Australian commitment, the size of the Team was decreased gradually from April 1971, before its complete withdrawal in December 1972.

Members of the AATTV were rarely together as a single unit, apart from on ceremonial occasions, such as ANZAC Day and the presentation of the US Army Meritorious Unit Commendation by General Abrams (Commander MACV) at Vung Tau on 30 September 1970.

Photo 5-4.2 - AATTV members marching at the parade for the awarding of US Army Meritorious Unit Commendation at Vung Tau 30 Sept 1970. Source: AWM P02636.022.

Team members operated as individuals, in pairs, or occasionally in groups of no more than ten. Their role in Vietnam was to train and advise South Vietnamese units in their fight against the North Vietnamese Army (NVA) and the Viet Cong (VC). As a result of their unique deployment, team members worked in many provinces of South Vietnam. Although primarily deployed in the field, on 9 February 1971 the AATTV conducted the first course held at the new Jungle Warfare Training Centre (JWTC) in Nui Dat. AATTV soldiers also served in Mobile Advisory and Training Teams (MATTs) operating within Phuoc Tuy Province, in III Corps.

Team members acted as advisers during combat operations and assisted with artillery and aerial fire support. They occasionally led South Vietnamese or Montagnard sub-units on operations.

The AATTV remained in Vietnam after the 1st Australian Task Force (1ATF) was withdrawn late 1971. It was stationed in Phuoc Tuy Province in 1972 and focused on training. It also assisted with training Cambodian soldiers of the Forces Armées Nationales Khmer (FANK). The team was withdrawn from active service on 18 December 1972 and was disbanded in Australia on 16 February 1973. It has the distinction of being the longest-serving and most highly decorated Australian unit of the Vietnam War: it was operational for over ten years and four of its members were awarded the Victoria Cross (VC).

A total of 1,009 men served with AATTV over a period of ten years, consisting of 998 Australians and 11 New Zealanders. 34 members of the team died during their service in South Vietnam including one member of the RASigs. 122 team members were WIA.

Royal Australian Corps of Signals

RASigs contribution to AATTV was small with 20 members serving with the Team. The posting was not signals related (although it came in handy at times) but purely focused on training abilities, infantry skills, and small unit tactics. Some were sergeants and promoted temporary WO2 for service with the team. RASigs team members are as follows:

Major Kenneth Redman	WO2 John Gibson (tour also 103 Sig Sqn)
Major Barry Tinkler, MBE	WO2 Michael Gill, MiD (KIA)
Major Roland Webb	WO2 James Husband, BEM (tour also 7RAR)
Capt Robert Baird	WO2 Colin Judd
Capt Ronald Crewe	WO2 Douglas Lawson (tour also 709 Sig Tp)
2Lt Antony Morris, MiD	WO2 Kevin MacPherson
WO1 Lindsay Allen	WO2 Thomas McNee (two tours AATTV)
WO2 Maurice Anstee (tour also 104 Sig Sqn)	WO2 Geoffrey Munro (three tours AATTV)
WO2 Mervyn Cranston (WIA)	WO2 Donald Watts
WO2 Athol Folbigg	WO2 Alan Williams (tour also 3 SAS Sqn)

The first 'Pronto' to serve was Captain Barry Tinkler who arrived with the first group of AATTV in August 1962 and was promoted Major during his tour and awarded an MBE for his service with the team in January 1965.

The last 'Pronto' was WO2 Geoffrey 'Darby' Munro who left South Vietnam when the last of the team withdrawn, December 1972. Darby is most likely the longest serving member of the team doing three tours with a total service of three and a half years.

Communications was not the team mission but the core skills of RASigs members were sometimes used. For example, WO2 Athol Folbigg was the 5th SFGA, C Team Communications Officer at Danang in 1965. Also Major Barry Tinkler was sent to the 22nd ARVN Division at Kontum, to bring unused WS510 Radio Sets into effective operation, which Barry successfully did in 1963.

One RASigs team member, WO2 Michael 'Mick' Gill, was killed in action (KIA) and was awarded a MiD posthumously. In a battalion-scale operation on 6 May 1969 the 232nd Company of the Mobile Strike Force, under command of WO2 Ray Simpson was moving through the jungle of large trees and dense bamboo undergrowth in rain and poor visibility in II Corps area near the junction of the borders of South Vietnam, Laos and Cambodia. When one of his platoons became heavily engaged with the enemy Simpson led the remainder of his company to its assistance. As the company moved forward, one of the platoon commanders, WO2 Mick Gill, was seriously wounded and the assault began to falter. Simpson, in the face of heavy enemy fire, moved across open ground and carried Gill to safety. He returned to his company then crawled forward to within ten metres of the enemy. From here he lobbed grenades into their positions. Simpson then

ordered his company to withdraw and he and five indigenous soldiers covered the withdrawal. Ray Simpson was awarded the VC in part for his actions to save WO2 Mick Gill. Posthumous Mick was awarded a MiD and the US Military awarded their Bronze Star with V for Valour. *Note: The MiD and the VC are the only awards under the British Imperial system, used by Australia during the Vietnam War, that can be awarded posthumous.*

Photo 5-4.7 - WO2 Michael 'Mick' Gill checking on a Vietnamese sentry.
Source: Internet.

WO2 Mervyn 'Merve' Cranston was wounded in action (WIA) in May 1968 by shrapnel at Quang Tri, near the DMZ (I Corps). Also WO2 Thomas 'Tom' McNee, on his second tour was medical evacuated from South Vietnam because of illness in September 1970.

Capt's Baird and Crewe plus WO2's Cranston and Williams were involved with special forces before and after their tours with the team.

2Lt Antony Morris was a national serviceman, who did Officer training at Scheyville and remained in the Army, served with the team and had a long military career in RASigs.

RASigs Assignments AATTV^{2, 12, 13 and 14}

Major Kenneth 'Ken' James Redman (15 Oct 70 – 14 Oct 71).

Oct–Nov 70: Assistant Provincial Adviser, Quang Tri.

Dec 70–Jun 71: Assistant Security Adviser/Territorial Security Adviser, Quang Tri.

Jul–Sep 71: Assistant Chief of Staff, Territorial Security, Quang Tri.³

Foreign Awards: Army Commendation Medal for Service (USA), Gallantry Cross with Silver Star (RVN), Armed Forces Honour Medal 1st Class (RVN) and Armed Forces Honour Medal 2nd Class (RVN).

Career Overview: Graduated from the Officer Cadet School Portsea in 1954. Retired Major.

Major Barry Ross Tinkler, MBE (3 Aug 62 – 16 Sep 63).⁴

Aug 62–Sep 63: Hiep Khanh Training Centre near Hue, Tactics Committee then S-3 Operations and Training. Visited USSF camp Khe Sanh.

Apr 63: Visited 22 ARVN Division, Kontum, to repair 510 radio sets.³ Mission to bring unused WS510 Radio Sets into effective operation. Successful mission.⁵

Aug 63: Studied signals equipment and techniques J-6, MACV.³

Imperial Awards: Member of the Order of the British Empire (MBE).

Foreign Awards: Meritorious Unit Commendation (USA), Gallantry Cross with Silver Star (RVN), Armed Forces Honour Medal 1st Class (RVN) and Cross of Gallantry with Palm Unit Citation (RVN).

Career Overview: Graduated from the Royal Military College Duntroon in 1954. Served in Malaya as the platoon commander of C Company, 2RAR (RASigs Officer). First 'Pronto' in South Vietnam that was promoted Major during his AATTV tour plus awarded the Member of the **Order of the British Empire (MBE)**. Promoted Lieutenant Colonel and returned to Vietnam on official duty from Army HQ, Canberra. (26 May – 23 Jun 71). Later CO, 6 Sig Regt.

Major Roland 'Roly' Paul Webb (13 Jan 71 – 16 Dec 71).

Jan–Feb 71: HQ, AATTV, Saigon.

Mar 71: DSA, Duc Thanh, Phuoc Tuy.

Apr–May 71: DSA, Xuyen Loc. Jun–Jul 71, Xuyen Moc. Aug–Sep 71, Long Le.

Oct–Dec 71: Duc Thanh, Phuoc Tuy.³

Foreign Awards: Staff Service Medal 1st Class (RVN) and Cross of Gallantry with Palm Unit Citation (RVN).

Career Overview: Graduated from the Officer Cadet School Portsea in 1952. Later Lieutenant Colonel.

Captain Robert 'Bob' Alexander Baird (24 Feb 71 – 12 Aug 71).

Mar–May 71: TOC–Fwd, 1st ARVN Div HQ, near Quang Tri.

Jun–Aug 71: TOC, HQ 1st Div, Hue.³

Foreign Awards: Army Commendation Medal for Service (USA) and Cross of Gallantry with Palm Unit Citation (RVN).

Career Overview: Bob served in the Royal Marines before joining the Australian Army and was posted to 1 SAS Company from 1959-63 with the trade Operator Wireless and Line (OWL). He served with 126 Sig Sqn (Commando Unit) and was commissioned (Administrative Technical Officers' Course) in the late 1960s before serving with AATTV. Later Major, OC 126 Sig Sqn in 1975-76.

Captain Ronald 'Ron' James Crewe (16 Apr 72 – 9 Dec 72).

Apr–Nov 72: JWTC, Van Kiep, Phuoc Tuy.³

Foreign Awards: Nil located.

Career Overview: Graduated from the Officer Cadet School Portsea in 1967. Served with the 1st Pacific Island Regt in PNG and then 6 Sig Regt. AATTV in 1972. 2IC 126 Sig Sqn (Commando Unit) in 1975-76 and then United Nations Military Observer in Tel Aviv, Israel. later Major, OC 152 Sig Sqn (SAS) Jan 78 to Jan 80 and retire as a Lieutenant Colonel. Ronald also was awarded the **Member of the Order of Australia (AM)** on 26 Jan 1985 in recognition of service with the Australian Defense Staff, PNG.

2nd Lieutenant Antony James Morris, MiD (16 Jun 71 – 16 Dec 71).

Jun–Sep 71: MATT, Phuoc Tuy.

Oct–Nov 71: JWTC, Van Kiep.³

Imperial Awards: Mentioned in Despatches (MiD).

Foreign Awards: Cross of Gallantry with Palm Unit Citation (RVN).

Career Overview: Graduated from the Officer Training Unit Scheyville in 1969 (National Serviceman). Awarded MiD for service with the team. Later Lieutenant at 7 Sig Regt in 1975 and OC 72 EW Sqn 1981-82. Staff College in 1983 Defence Signals Directorate (DSD) 91/92. Retired Lieutenant Colonel.

WO1 Lindsay Thomas Allen (5 Aug 71 – 8 Aug 72).

Aug–Nov 71: Admin WO, AATTV Danang.

Dec 71–Aug 72: JWTC, Van Kiep.³

Foreign Awards: Gallantry Cross with Bronze Star (RVN), Armed Forces Honour Medal 2nd Class (RVN) and Cross of Gallantry with Palm Citation (RVN).

Career Overview: Enlisted in 1944 (late WW2) and serve for 35 years. Army Office on retirement.

WO2 Maurice 'Morrie' George Anstee (6 Oct 65 – 8 Jan 66) – First tour with AATTV

Oct 65–Jan 66: 5th SFGA team A-107 Tra Bong, Quang Ngai.³

Foreign Awards: Cross of Gallantry with Palm Citation (RVN).

Career Overview: Army rugby player. Maurice did a second tour in South Vietnam with 104 Sig Sqn 16 Apr 67 to 5 Feb 68. A number of AATTV were temporary promoted to WO2 for their tour with the team. This was the case with Maurice as he was a Sgt while serving with 104 Sig Sqn in South Vietnam. Retired WO2.

WO2 Mervyn 'Merve' Bede Cranston (5 Feb 68 – 28 Jan 69). WIA

Feb–May 68: 3/2 ARVN, Gio Linh area, 1st Division, Quang Tri.

May–Aug 68: Van Kiep, LRRP Wing, Phuoc Tuy.

Sep–Oct 68: RD, Can Tho.

Nov 68–Jan 69: RF, Vin Binh.³

Foreign Awards: Presidential Unit Citation (USA), Gallantry Cross with Bronze Star (RVN) and Cross of Gallantry with Palm Citation (RVN).

Career Overview: Mervyn was WIA on the 6 May 1968 by shrapnel at Quang Tri. Originally RAInf, transferred to RASigs and then served in SAS.⁶ Later SSM at 2 Sig Regt. Retired WO2.

WO2 Athol Raymond Folbigg (25 Sep 64 – 9 Aug 65).

Oct 6: 5th SFGA B Team, Danang.

Nov 64–Jan 65: 1st SFG team A-324, Ta Ko, Quang Nam.

Jan-Feb 65: 5th SFGA C Team Danang, Communications Officer.³

Foreign Awards: Cross of Gallantry with Palm Citation (RVN).

Career Overview: Enlisted in Navy in 1947. Transferred to Army in 1954 so he could play representative rugby union in NSW and is a Drummoyne Rugby old boy. AATTV. Last posting WO1 at School of Signals in 1967.

WO2 John Andrew James Gibson (15 Jul 71 – 12 Jul 72) Second Tour AATTV.

Jul–Aug 71: MATT I, Phuoc Tuy.

Sep–Oct 71: NOTT 2, Phu Cat, Binh Dinh.

Nov 71: JWTC, Van Kiep.

Dec 71: AATTV Training Group, Vung Tau.

Jan–Jun 72: Long Hai Training Battalion.³

Foreign Awards: Meritorious Unit Commendation (USA), Training Service Medal 1st Class (RVN), Cross of Gallantry with Palm Citation (RVN) and National Defence Medal with Bronze Star (Cambodian)

Career Overview: John served with 103 Sig Sqn from the 26 Apr 66 to 30 Apr 67 on his first tour. SSM 130 Sig Sqn before AATTV tour. Later WO1. He was also the President of the AATTV Queensland Branch for many years and a strong supporter for the AATTV memorial at Canungra.

WO2 Michael 'Mick' William Thomas Gill, MiD (25 Feb 69 – 6 May 69). KIA

Mar 69: 5th SFGA Combat Orientation Course, Nha Trang.

Mar–May 69: A-203 and 232 Coy, Platoon Commander, 2 MSF B-20, 5th SFGA, Pleiku. KIA, 6 May 69, west of Ben Het.³

Imperial Awards: Mentioned in Despatches (MiD) – Posthumous.

Foreign Awards: *Bronze Star with V for Valour (USA), Meritorious Unit Commendation (USA) and Cross of Gallantry with Palm Citation (RVN).*

Career Overview: *Line Sgt before posting to AATTV. KIA on the 6 May 1969 and is interred at the Toowoomba Garden Cemetery, Queensland.*

WO2 James 'Jim' Husband BEM (14 Apr 64 – 11 Apr 65), First tour with AATTV.⁷

Apr–Aug 64: Dong Da National Training Centre, Weapons Committee.

Sep 64–Mar 65: 1/5 ARVN, 2nd Division, Quang Nam.³

Imperial Awards: *British Empire Medal (BEM) awarded before AATTV tour.*

Foreign Awards: *Meritorious Unit Commendation (USA), Gallantry Cross with Silver Star (RVN) and Cross of Gallantry with Palm Citation (RVN)*

Career Overview: *Korean War veteran with 2RAR and transferred to RASigs in 1953. Awarded the **BEM** in 1963 for services to the Army Apprentices School. Transferred back to RAInf in 1963 and posted to AATTV as above. Second tour was with 7RAR as A Company CSM (WO2) 16 Feb 70 – 4 Mar 71. Post South Vietnam promoted WO1 and posted as the first post WW2 Army Parachute School RSM. Last posting was RSM 6RAR. Awarded the **Order of Australia Medal** in 1999 and **Queens Jubilee Medal** in 2012.*

WO2 Colin 'Doc' Baxter Judd (11 Sep 64 – 7 Sep 65).

Sep–Dec 64: Dong Da Training Centre, Weapons Committee.

Jan–Mar 65: 1st SFG Team A-414 A Ro, western Quang Nam.

Apr 65: Joined A5/331 later A-104 Ha Than, Son Ha district, Quang Ngai.

May–Sep 65: Admin WO2 2nd ARVN Div and HQ AATTV Danang.³

Foreign Awards: *Meritorious Unit Commendation (USA) and Cross of Gallantry with Palm Citation (RVN)*

Career Overview: *Two tours in Malaysia and then posted to AATTV in South Vietnam and back to 208 (Commonwealth) Sig Sqn in Malaysia. Next posted to the Jungle Warfare Centre, Canungra as an instructor. Posted SSM, 139 Sig Sqn and following to OCS Portsea as an instructor on defence and attack. Promoted WO1 at the Senior NCO academy in Singleton. Took discharge in 1976.⁸*

WO2 Robert Douglas Lawson (2 Feb 71 – 26 Oct 71) Second tour with AATTV.

Feb–Apr 71: MAT 21, Quang Ngai.

May–Oct 71: 1st ARVN Division, Hue.³

Foreign Awards: *Cross of Gallantry with Palm Citation (RVN).*

Career Overview: *Robert first tour was with 527 Sig Tp (709 Sig Tp) as a Sgt Operator Keyboard Cipher (OKC) from 14 Sep 1965 to 19 Sep 1966. Retired WO2.*

WO2 Kevin John MacPherson (19 May 65 – 6 May 66).

Jun 65: 5th SFGA A-104 Ha Thanh, Son Ha District, Quang Ngai.

Jul 65: C Team Danang, 5th SFGA.

Aug 65: 5th SFGA A-107 Tra Bong.

Oct–Dec 65: Dien Ban sub-sector, Quang Nam.

Jan–Apr 66: 5th SFGA, Danang, Air Movements.³

Foreign Awards: Meritorious Unit Commendation (USA) and Cross of Gallantry with Palm Citation (RVN).

Career Overview: Korean War veteran with 3RAR and transferred to RASigs before AATTV tour. Retired WO2.

WO2 Thomas 'Mad Dog' McNee Two tours with AATTV, as follows;

1st Tour (19 Sept 66 – 5 Sept 67)

Sep 66–Mar 67: Phuoc Tuy, RF/PF team.

Mar–Aug 67: Nam Hoa sub-sector, Thua Thien.³

2nd Tour (29 Oct 69 – 11 Mar 70)

Nov 69–Feb 70: Nam Hoa sub-sector, Thua Thien.³

Foreign Awards: Army Commendation Medal for Service (USA), Presidential Unit Citation (USA), Meritorious Unit Commendation (USA) and Cross of Gallantry with Palm Citation (RVN)

Career Overview: RAInf enlisted in 1944 and transferred to RAA before joining RASigs. He was a jack of all trades, which included Lineman, Clerk and Drill Instructor. Thomas was Medevac with illness on his second tour with AATTV and medically discharged in Sept 1972.

WO2 Geoffrey 'Darby' Ernest Munro Three tours with AATTV, as follows;

1st Tour (11 Sep 64 – 10 Sep 65).

Sep 64–Jun 65: 1st SFG team A-113 then 5th SFGA team A5/334 A Shau later A-102, Thua Thien.

Jul–Sep 65: C Team, Danang.³

2nd Tour (23 Jul 68 – 10 Sep 70 with leave periods in 1969 and 1979).

Jul 68 –Sept 70: RD Cadre Training, Chuong Tien.

Aug 68: RD Cadre, Vin Binh.

Sep 68–Feb 70: RD Cadre, Can Tho.

Mar–Jul 70: RD Cadre, Can Tho. Apr 70, VDAT, Vinh Long.

Aug–Sep 70: VDAT, Vinh Binh Sector.³

3rd Tour (7 Jul 72 – 2 Dec 72).

Jul 72 – Dec 72: Long Hai Training Battalion. Oct–Nov 72, JWTC, Van Kiep.³

Foreign Awards: Army Commendation Medal for Service (USA), Meritorious Unit Commendation (USA) and Cross of Gallantry with Palm Citation (RVN)

Career Overview: Korean War veteran serving with the Australian Ancillary Unit in 1952 (RASigs). During Geoffrey's second Tour which was over a three year period he had leave twice out of country 24 Jul to 25 Aug 1969 and 12 Feb to 10 Mar 1970. Over three and half years serving with AATTV in South Vietnam. Geoffrey on the 1 Jan 2001 was awarded the **Centenary Medal** for service to the community.

WO2 Donald 'Don' Ernest Watts (30 Jul 69 – 9 Jul 70).

Aug 69–Jun 70: 1/3 ARVN, Hue, 1st Division.³

Foreign Awards: Meritorious Unit Commendation (USA) and Cross of Gallantry with Palm Citation (RVN)

Career Overview: Army rugby player. Korean War veteran with 1RAR (RASigs). Served in Malaya with the 28 Commonwealth Brigade Sig Sqn. Line Sgt at 127 Sig Sqn before AATTV tour. Retired WO2.

WO2 Alan Stewart Williams (29 Oct 69 – 29 Oct 70) Second Tour with AATTV.⁹

Nov 69–Mar 70: Platoon Commander, 5th SFGA, 2 MSF B-20, Pleiku.

Apr 70: MATT, Baria.

May–Oct 70: MATT 2, Dat Do, Phuoc Tuy.³

Foreign Awards: Cross of Gallantry with Palm Citation (RVN).

Career Overview: First tour with 3 SAS Sqn 15 Jun 66 to 15 Mar 67 then 16 Mar 67 to 24 Aug 1967 with Det 152 Sig Sqn (SAS). Posted South Vietnam with AATTV in Oct 1969 to Oct 1970. Later commissioned (Administrative Technical Officers' Course). Last posting 7 Sig Regt retiring as a Major.

Summary

The team was the longest serving and most highly decorated Australian Military unit to serve in the Vietnam War. RASigs contribution to the team was small (about 2%) but our corps members more than held their own and were involved in many combat operations and unit formations plus worked on some shadow missions with USSF and USCIA. They more than occasionally led South Vietnamese or Montagnard sub-units on operations. In addition, they trained and advised South Vietnamese and Cambodian Soldiers, Montagnard Hill Tribesmen, Khmer Kampuchea Krom (KKK) and Nung Mercenaries.

Team members received many decorations and awards for their service. RASigs member's decorations and awards are listed under the 'RASigs Assignments AATTV' heading above and on the 'Pronto in South Vietnam' website, 'Rolls' page (<http://pronto.au104.org>).^{10, 11}

AATTV Memorial

The AATTV Memorial is located at Kokoda Barracks, Canungra, Queensland. The memorial honours all members that served with the team, with a tree and plaque for each team member – over 1000 trees. An Australian flag has been placed with each tree where the member was KIA or has since passed away.

11. Major Tinkler and WO2 Husband were awarded the 'General Service Medal 1962 with Clasp – South Vietnam' as they were in South Vietnam before 28 May 1964. Rare as only 70 awarded and all the AATTV except 2.
12. RASigs AATTV manning not detailed in Pronto in South Vietnam Attachment B as it was not a RASigs unit and data located by unit name.

13. It is important to take note in the early years of the Vietnam War some AATTV members were offered Foreign Awards and Decorations but due to Australian Government's policy at the time, were not allowed to accept awards. Indeed, many members who were awarded foreign decorations on the battlefield may have received the award but no documentation, some got documentation but no award and some who would have been decorated, received neither the award nor documentation. No doubt the complete history of foreign awards for the Team will never be fully revealed or known.
14. Career overviews and awards with the assistance of Barry Tinkler MBE, David Lawson, Ken Mackenzie OAM, Lorrie Johnstone, Robert Hartley AM, Gavin Lee and others via facebook comments.

CHAPTER 6 - ACTION IN 1968

The Enemy's Aim

North Vietnam had the strategic aim to win at the Paris peace talks what was not being won militarily - ousting the United States and taking over South Vietnam. To strengthen her bargaining position she needed a victory capable of psychological exploitation on the world scene. Saigon was the obvious target.

From early May 1968, enemy forces were committed to heavy sustained action to the west, north west and north of Saigon with the aim of disrupting normal activity in Saigon and rendering government control impossible. The enemy committed a total of 11 main force regiments in the attacks against Saigon, including Cholon, and nearby areas.

The Phu Tho Incident

Phu Tho was a military compound on the road between the Saigon racecourse and the Tan Son Nhut airport. It housed in February 1968 the 110 Signal Squadron Headquarters and the HF transmitting station providing the rear link to Australia. Also in the compound were some US administrative units.

Photo 6.1 (left) - One of the Phu Tho compound guard towers under construction (March 1968)

Photo 6.2 (right) - Main 110 Signal Squadron Phu Tho bunker under construction (March 1968)

Although not directly threatened by the actions in the North Vietnamese Tet offensive early in 1968, it became obvious after this event that the area at Phu Tho could be threatened in any future offensives in the Saigon area. Its defensive capability was virtually non-existent. The perimeter consisted of a high single barbed wire fence, which only served to prevent the neighboring refugee camps from encroaching

further on the compound. This fence was only erected after the refugees had occupied the area of the rear guy wires for the 102 foot masts supporting both the rhombic and V antennas. The compound did have a number of watch towers which were manned at night by unit duty personnel and a detachment of 6 from the 1 ATF unit tasked on a cyclic basis as Defence Detachment.

After the Tet offensive the immediate action taken was to complete the installation of a reserve HF transmitter in the 110 Signal Squadron area at Vung Tau. In late March and early April 1968 intelligence reports indicated a threat of another offensive on Saigon. The squadron had initiated the development of a defensive area at Phu Tho by the construction of a smaller compound around the unit's area to include the hardening of the watch towers in the area, defensive wire fences and the construction of a number of bunker positions.

In April 1968 Commander AFV (Major General A.L. McDonald) visited the area and after a briefing and a tour ordered the cancellation of all stand down leave until the Phu Tho defences as planned were doubled. This was completed for the first red alerts in the latter half of April 1968. By the 5 May 1968 no alerts existed and just the normal duty team of a Sergeant Lionel Porter and 5 other ranks from the Squadron plus the infantry detachment of a Corporal and 5 remained at Phu Tho overnight.

At about 0600 hours on 6 May 1968 a Viet Cong force reached the north west corner of the compound then moved through the houses on the north of the compound. Helicopter gunships engaged the force and it was eventually halted by an ARVN force. No direct action was taken by the VC against the compound during this move, but during their withdrawal a small amount of fire was directed at the compound without inflicting any casualties.

When the first contact occurred at 0600 hours, the total duty staff of the US transport compound in Phu Tho appeared in the 110 Signal Squadron inner compound, including one man in a state of shock. The Duty Signals NCO had to thus find additional protected locations. These were constructed out of steel trunks and cement bags from the Q store.

An aerial reconnaissance by Captain Ian Willoughby in a borrowed helicopter ruled out the possible insertion of additional troops into the area by air, because of ground fire. Also the problem of providing a landing zone in an area containing nested rhombic and sloping V antennas, so two landrovers were used to insert additional troops into the Phu Tho compound.

As the battle proceeded between the VC and the ARVN in the village to the north of the compound a number of explosions occurred just outside the compound and some form of explosive projectile struck the unit's shower block just beside the watch tower. The explosions in the village started a fire, which spread quickly along the huts beside the compound. After watching the mast supporting the emergency V antenna collapse, because its rear guy wire was burnt through, it became obvious

that the end mast of the rhombic antenna would also suffer the same fate. The staff at FWMAO, were informed of this situation and a signal was dispatched to Melbourne. As the fire reached the antenna guy wires, the transmitter was closed down and the unit personnel watched as the mast fell. Even though the area was still under hostile fire, a small party from the unit moved out into the antenna field to cut the broken wires of the fallen Type 1 antenna away from the still standing Type 2 of the nested rhombics. This resulted in the circuit being re-established to Melbourne on the one remaining antenna after an outage of only 90 minutes.

Photo 6.3 - Part of Phu Tho compound on fire. Note Antenna (April 1968)

Photo 6.4 - FWMAO Building, Saigon (1968)

During this period the remaining personnel had also been kept busy preventing the

fire from destroying the two shelters containing stores or from spreading to the area of the masts supporting the inner rhombic.

The Phu Tho area was cut off from the rest of Saigon for two days during which time the VC were in some parts of the perimeter fence. Small arms fire, mortars, grenades and rockets were all received in the compound during this period.

Sergeant Lionel Porter was Mention in Despatches for displaying self-discipline, and an outstanding sense of duty and responsibility towards the safety of the soldiers under his command, and for the security of this key compound.

Within 7 days unit riggers had reconstructed the outer rhombic. However, at this time planning had started to re-locate the transmitters for the rear link to a more secure location.

The AUSTCAN Receiver Station located at Long Binh with US STRATCOM receivers came in for its share of enemy action a few days later. On 11th May 1968 Long Binh was attacked with 120mm rockets. One rocket caused several casualties, including Signalman James Cole of 110 Signal Squadron and some minor damage to the 110 Signal Squadron installation.

Photo 6.5 - Australian Guard at front of Canberra BEQ (1968)

During the second offensive on Saigon in 1968, Signalman John Veall of 110 Signal Squadron was WIA early on the 1st June 1968. After all night fighting in Cholon, near the Canberra BEQ, enemy soldiers were observed moving into buildings close to the BEQ. Some members of 110 Signal Squadron engaged the enemy from the roof of the BEQ and Signalman Veall was shot in the upper arm, in the return fire.

In August 1968, 110 Signal Squadron vacated the Phu Tho compound, the transmitters being re-located to a new hut in the centre of the 1 ATF area at Nui Dat, and the squadron headquarters and Q store moved in with the Vung Tau

Detachment.

FSPB Coral

Operations by 1 ATF increased in size and in distance from Nui Dat during 1967. Then during the period 24th January - 2nd March 1968, Operation COBURG was conducted in Bien Hoa Province some 50 kilometres from Nui Dat. It was the most extensive operation independently undertaken by 1 ATF since its arrival in South Vietnam and it involved the main headquarters of 1 ATF being away from its base longer than on any previous occasion.

Photo 6.6 - 104 Signal Squadron reconnaissance group for Operation COBURG. From left - Sig Robert Parkyns, ?, Maj Norm Munro, ?, Sig Geoffrey Molineaux and ? (1968)

Photo 6.7 - 104 and 110 Signal Squadron vehicles at start point Nui Dat for deployment on Operation Toan Thang. Note first truck (2½ ton) AN/MTC-7 and AN/MGC-17 Shelters, second truck (5 ton) AN/MRC-69 Shelter (April 1968)

The lessons learned by 104 Signal Squadron from this operation were put to good use in Operation TOAN THANG 25th April - 5th June 1968. This operation in turn exceeded COBURG in size and distance from Nui Dat (80 kilometres).

Initially 1 ATF operated with two battalions about 15 kilometres east of Long Binh on Highway One in Long Khan Province and one battalion in the Nui Dat area in Phuoc Tuy Province. HQ 1 ATF (Main) was established at a US Army base BEARCAT and the communications were much the same as for Operation COBURG.

On 12th May 1968 major elements of 1 ATF were airlifted into an area north of Saigon eventually to be known as Fire Support Patrol Base CORAL. This was to intercept the movement of 7 NVA Division to Saigon and cut off its withdrawal. The advance party of HQ 1 ATF included Major Norm Munro, now commanding 104 Signal Squadron and 5 other ranks. This TF HQ advance party had to establish a task force headquarters area.

The party was landed some 1500 metres from the proposed headquarters location and so the small signals element had to manpack its equipment which was to operate initially as a substation on the task force command net. This was no mean task as the equipment included an RT-524 radio (the receiver/transmitter of the vehicular borne AN/VRC-12 series VHF equipment), 150 amp hour batteries, 300 watt charger, RC-292 antenna, AN/GRA-39 remote control unit and an AN/PRC-25 radio. It was an effort to prove well worthwhile. Early on the morning of 13th May 1968 the base came under attack from enemy mortar, rocket and small arms fire, causing signals casualties to men and equipment (including the RC-292 antenna). Temporary repairs enabled the radio station to remain operational and it was the means by which Spooky (DC3 aircraft equipped with illumination and six miniguns) and helicopter gunships (Light Fire Teams) were called in to support the units under attack. The FSPB CORAL being partly over-run by the enemy during this action. Signaller Gamble was WIA during the fighting.

The main body of 1 ATF arrived later on 13th May 1968 bringing the strength of the signals group to 51 including two 3 man detachments from 110 Signal Squadron and the 7 man detachment of US 53 Signal Battalion. It began digging in, including bulldozing 2 metre deep holes for the signal centre and VHF radio bunker. Next day an unexpected rain storm flooded the radio bunker swamping most of the radio equipment, but after draining the water out all operated satisfactorily. The signal centre was also flooded but not so badly.

At 0240 hours on 16th May 1968 an NVA regimental attack was launched against FSPB CORAL. It started with 50 minutes of mortar and rocket barrage which included the signals area and was followed up by ground attacks, one enemy party coming within 50 metres of the signals perimeter which was directly protecting the task force command post. The enemy finally broke contact at 0645 hours. Signaller A.H. Young was KIA during this action and two other Signallers (John Koosache and Ian Crosthwaite) were WIA.

Photo 6.8 - Setting up strong point with AN/TRC-24 Antenna in back ground at FSPB (1968)

Diagram 6.1 - Communications Operation TOAN THANG (May 1968)

The Deputy Commander of 1 ATF at the time wrote later. ***"For a period of approximately three weeks the task force was exposed to some of the heaviest fighting seen by Australians in Vietnam. Throughout these engagements' and a number of subsequent attacks by fire, the signals squadron not only held their ground but continued to maintain communications".***

Photo 6.9 (left) - Entrance to 1 RAR CP at FSPB Coral (1968)

Photo 6.10 (right) - Weapons captured at FSPB Coral by 1 RAR - Sig Robert Parkyns M16 Rifle on the pile (1968)

Subsequently FSPB CORAL was developed and new bunkers constructed, radio relay vehicles lowered and bunkered and strong defences developed. Three more mortar/rocket attacks were experienced but damage was limited to soft equipment and exposed cables.

Operation TOAN THANG tested the task force signal squadron under most contingencies likely to arise in the theatre. Whilst maintaining all communications facilities at Nui Dat base, it undertook a deployment from Nui Dat to one field base and from there to another base (CORAL) in an enemy controlled area. It required the provision of the full range of communications facilities available to the squadron, and it involved maintenance of communications whilst under enemy fire. It is a credit to those concerned that at no time was there a loss of command communications. This saved many Australian lives.

It was at the time of the action at FSPB CORAL that 110 Signal Squadron was also most extended. It was operating in 9 locations, including several detachments in support of communications to CORAL, in which 23 men were involved. During this period the availability of the radio relay trunk bearer system to HQ 1 ATF (Main) averaged 97.5%. Again, a highly creditable performance, but this forward communications task of 110 Signal Squadron represented only a small part of all the facilities it had to continue to provide at the same time.

Photo 6.11 (left) - 1 RAR Switchboard (SB-22) at FSPB Coral (1968)

Photo 6.12 (right) - 1 RAR and Radio Detachment (104 Signal Squadron) returning to Nui Dat from FSPB Coral (1968)

Brigadier S.C. Graham, who had commanded 1 ATF during most of 1967, writing later about the mobility of the task force, commented. ***"The battlefield in Vietnam was the whole of South Vietnam and to some extent parts of neighboring countries. Whilst the allied forces involved were large in numbers the actual number of combat troops available and able to meet any kind of contingency over such an area was not large at all. Mobility exploited by communications enabled these troops to meet commitments which units of similar size in World War II or Korea could never have hoped to meet. Intelligence, which depended largely on communications, was good enough to obviate the previously inevitable volume of unproductive activity. Tactical and logistical risks could be taken with the secure knowledge that emergency reinforcement or resupply was always available rapidly if needed. All in all, this sort of situation made the Australian Task Force worth many times its actual size".***

CHAPTER 7 - IMPROVING COMMUNICATIONS

General

Many improvements to the facilities provided by both 110 Signal Squadron and 104 Signal Squadron were begun in 1968 and most came to fruition towards the end of the year.

Force and Rear Links Communications

The new AUSTCAN transmitter station was installed in a site at Nui Dat and began continuous operation on 9th August 1968. No doubt this relocation received some impetus from the attack on the station at Phu Tho. Whilst Engineers completed construction of the transmitter building and generator shed, a team from 127 Signal Squadron, with help from technicians and riggers of 110 Signal Squadron, did the installation and construction of Type 1 rhombic antennas. Shortly after the station began operations the construction of a horizontal log periodic antenna (LPA) was started. The location of large antennas in the Nui Dat area was not an easy decision because of the many helicopter landing zones.

Photo 7.1 - LPA Antenna at Nui Dat (1970).

At Long Binh all the aerial feeders and power cables for the AUSTCAN receiver station were buried and the long planned construction of Type 1 rhombic antennas begun by August 1968 and completed the following month. When the receivers were first moved from Tan Son Nhut to Long Binh, US aerals were used but, not being

oriented towards Australia, signal strength was not optimum.

An alternative 4 channel SSB transmitter/receiver station was constructed at Vung Tau on Logan Hill, named after Signaller B.A. Logan of 145 Signal Squadron who was killed in action in 1967 whilst attached to a US unit. The station was brought into service in May 1968 using temporary antennas but these were replaced before the end of the year with log periodic antennas, a vertical for transmit and a vertical and a horizontal for receive.

Photo 7.2 - LCpl Badcock (front) working in SYSCON room at Nui Dat (1971).

Whilst the installation team from 127 Signal Squadron was in Nui Dat to install the AUSTCAN transmitter station it installed a new system control room, with further work undertaken by 110 Signal Squadron after the detachment returned to Australia in September. The detachment also did the technical installation of Klienschmidt telegraph equipment in the 104 Signal Squadron communications centre. In all, this detachment, and the rigger detachment of 127 Signal Squadron which stayed in theatre some weeks longer, had a very busy period resulting in substantial improvements in communications within the theatre and to Australia.

Photo 7.3 (left) - COMM-CEN Traffic area of 104 Signal Squadron (1971).

Photo 7.4 (right) - US Communication installation on VC Hill, Vung Tau (1968).

Diagram 7.1 - AFV Communications (August 1968).

These improvements to the fixed communications were no doubt appreciated by 6 Signal Regiment in Watsonia and by 135 Signal Squadron in Canberra who sent and received much of the rear link traffic. That squadron also manned the Army Headquarters end of the secure telex conference circuit, a well used facility.

Line

A major project under the direction of Warrant Officer Class Two John Ring was the replacement of all the field cable in Nui Dat with permanent underground cable. Work started at the beginning of 1968 with a line detachment from Australia helped by 104 Signal Squadron. By February 1968, 3 trench digger plants were being used. Failure of some of this plant led to local construction of a mole plough. However it was not until July that the cutover to the permanent cables was effected, resulting in a very marked improvement.

Line in the Vung Tau area had been rehabilitated earlier in the year. The requirement for line for telephones had grown substantially since the force first arrived. By August 1968, EMU switchboard had connected 166 CB lines, 53 magneto lines and 7 dial lines, with a further 6 direct "hot lines" connected through EMU frame. The average daily call rate was 6000 before the end of the year. EBONY switchboard had just under 100 subscribers with a further 47 on the switchboard in the 1 ATF command post (EBONY CP).

Bearer and Keying Circuits

In-theatre trunk circuits were quite an assortment, Australian laid line, Australian AN/MRC-69 radio relay, US microwave and line and Australian VHF bearer equipment. The line was not reliable, there was interference on VHF radio systems, and US hired circuits had to await circuit restoration priorities in a large system. Despite this, circuit availability was 95% and higher.

Some of the line around Saigon had been superseded by the AWA 4FJ VHF bearer equipment. Initially it was used for keying from the FWMAO building to the Ba Queo receiver station at Tan Son Nhut. This station came under attack on 30th January 1968 in the Tet offensive and so it was completely evacuated and relocated at Long Binh with the US STRATCOM receivers. This freed the 4FJ bearer to go to the transmitter station on 3rd February 1968 to replace the line circuits. However, interference coupled with inflexibility in frequency changing led to this equipment being closed down before the end of the year.

In April 1968, 110 Signal Squadron began tests with Siemens Halske FM 24/400 bearer equipment and VZ 12K channeling equipment which was in AUSTCAN service in Australia. Some encouraging results were obtained and installation of the first equipment began in December 1968 on the Saigon-Long Binh circuit. It was remarkably better than any other bearer system in the theatre.

Task Force Signals

The radio facilities operated from the Nui Dat feature by 104 Signal Squadron and other task force units had grown without any master plan. In August 1968, 104 Signal Squadron began a major rebuilding program to provide for its own radio requirements, the radio relay equipment of 110 Signal Squadron and the requirements of other units, including Artillery.

It involved considerable earthworks, bunkers, shelters and accommodation buildings, all sand-bagged, and an SAL block. At the time 1 ATF operations did not involve deployment of a headquarters away from the base, leaving some capacity in 104 Signal Squadron to undertake this new work with help by sappers. By December 1968 it was completed except that the "other units" had to install their equipment.

**Photo 7.5 - 104 Signal Squadron members digging the COMMCN bunker
(Late 1968).**

An M577-A1 Armoured Command Vehicle '85 Charlie' was allocated to 104 Signal Squadron for use as a forward signal centre. It was first used in Operation CAPITAL II in November 1968 (deployed to FSPB Lion). In addition to its normal VHF radio fitment, it was equipped to provide a secure duplex RTT circuit from HQ 1 ATF (Main) to HQ 1 ATF(Rear), a secure simplex RTT circuit from HQ 1 ATF (Main) to 1 ALSG (Forward), HF back up circuits and the EBONY Forward switchboard. A commercial air conditioner was also fitted. It proved to be eminently successful, equipment failures due to overheating were virtually eliminated whilst the speed of setting up communications equipment in a forward area, including interconnection

via snap lock multi-pair cables to the other command vehicles (operations, artillery and air) and radio relay tails, and the elimination of the need to construct a SIGCEN bunker were especially important.

Photo 7.6 (left) - LCpl Malcolm Fergusson manning HF RTT Link - AN/GRC-106 (left), TT-4 (centre) and KW-7 (right) (1968).

Diagram 7.2 - Communications Operation CAPITAL II (November 1968).

Photo 7.8 - 104 Signal Squadron ACV deploying to FSPB Lion (Nov 1968).

Another activity, whilst not concerned with communications but certainly affecting the task force signal squadron, began in 1968. On 27th December 1968 the squadron began providing complete section-size patrols for one or two days each outside the 1 ATF base perimeter. In June 1970 on the second afternoon of a patrol under the command of Squadron Sergeant Major Warrant Officer Class Two Anthony Huston some enemy were observed about 4 kilometres east of the task force base. They were engaged with small arms fire of the patrol and by artillery fire, shortly after, at 1700 hours, two gunships began supporting the patrol and estimated that there were about 20 in the enemy party. The patrol was then engaged from three sides with small arms fire and it withdrew through several defensive positions it established while artillery fire was brought down and an APC mounted infantry platoon was dispatched to flush out the enemy.

Consolidation

Whilst in mid 1967 intra-theatre and rear link communications just managed to meet day-to-day needs, the quality of some circuits was poor and reliability unacceptably low. It was the best that could be provided within the resources available to meet the demands placed on the communications system. The improvements obviously needed took time to plan and, when the equipment was available, time to install.

133 Signal Squadron (the Base Signal Park at Penrith) contributed here, and throughout the campaign. Described by those in Vietnam as **"the best mail order firm in the business"** it very rapidly met demands for all items it was responsible for supplying. There were often times when RA Sigs units in Vietnam wished it was responsible for the supply of all its technical equipment and spare parts.

Task force signals had few problems with field communications but the essentially fixed services within the base at Nui Dat hovered close to the same brink of disaster as communications elsewhere.

By the end of 1968 very substantial improvements had been effected to intra-theatre communications, the rear link to Australia and within 1 ATF. It was a time of consolidation and it provided a sound footing for continuing improvements during the remainder of the campaign.

CHAPTER 8 - MID TERM

Force Signals

The year 1969/1970 was one of the busiest years for 110 Signal Squadron, as shown by messages handled and the extensive redeployment of squadron assets to meet a changing situation. Traffic through the Saigon Major Relay Station reached 104,900 in September 1969, almost 3,500 per day, the highest yet recorded and not exceeded at that MRS. Telephone calls through the EMU switchboard (Vung Tau) reached a high in April 1970 at 7000 per day, or one every six seconds in the busy daylight hour; it was more than a year before this record was broken.

In August 1969 the message situation was such that parts of the signal system were approaching saturation for the current organisation, circuit standards and operator skill levels. Intensive efforts at improvement were made in the weaker areas, such as the Vietnam - Australia HF circuit. The maximum power of five kilowatts from each transmitter was marginal, every element of the system was regularly checked to achieve the last watt of performance. Any unnecessary outage compounded the saturation problems by causing re-transmissions and service messages.

The 252 members of 110 Signal Squadron were scattered in five fixed locations - Saigon, Long Binh, Vung Tau, VC Hill and Nui Dat; in addition there were often temporary deployments of AN/MRC-69 terminals to fire support bases or similar tactical locations.

Photo 8.1 - VC Hill, Vung Tau (taken from 110 Signal Squadron lines) (1968).

In 1969 it became evident that the Australian presence would eventually contract towards Vung Tau and the squadron planned to reorganize accordingly.

Long Binh was the US STRATCOM receiver site in which the Australian receivers on the Australian - Vietnam circuit were located. Extensive testing over several months showed that Vung Tau was also suitable so the receivers were moved there in November 1969, incidentally releasing the Siemens Halske 24/400 UHF bearer system between Saigon and Long Binh. This equipment was re-installed between VC Hill and Vung Tau in lieu of AN/MRC-69 tactical radio relay system. Such was the Siemens Halske reliability that it was placed unmanned in the US 69 Signal Battalion tropospheric scatter facility on VC Hill, further reducing complexity of squadron deployment.

Persuading the signal battalion commander to permit the installation in his area required some careful diplomacy. The American colonel required everything in his installation to be immaculate - no dirty labels or greasy finger marks on equipment and he was a little dubious at first of Australian standards. After several months he unfailingly showed his visitors 'the Australian equipment' and sometimes requested the presence of an Australian Signaller to stand beside it! There was always a good relationship between US 69 Signal Battalion, the giant on VC Hill, and 110 Signal Squadron down on the sandhills. Volleyball and similar activities were mixed with the electronic relationship.

By early 1970 the Siemens Halske 24/400 equipment formed a triangulated commercial radio relay links from between Saigon to Nui Dat, Nui Dat to Vung Tau and Vung Tau via VC Hill back to Saigon. This freed the tactical radio relay AN/MRC-69 equipment for operations out of Nui Dat.

Photo 8.2 - Communication equipment at 110 Signal Squadron, Vung Tau (1970).

Early in 1970 planning began to move the rear link transmitters from Nui Dat to Vung Tau. The new building was completed and equipment installation by a detachment

of 127 Signal Squadron, under Lieutenant Fergie Shaw, assisted by 110 Signal Squadron, was well under way in June 1970 when it was ceremonially dubbed Tieng Noi Uc, a rough way of saying "Voice of Australia" in Vietnamese. Preparation also began to rebuild Vung Tau into the major relay so that Saigon could eventually be closed.

Photo 8.3 - AUSTCAN E513 Transmitters at Vung Tau (1970).

All these activities helped keep morale high, particularly in early 1970. Evidence of the spirit of the squadron was that in March 1970 10% of its members were actually on voluntary extension, serving an additional period beyond the normal twelve months. Motives for extension varied, one particularly gifted technician on extension spent all his spare time as honorary English teacher at one of the local schools.

The RA Sigs Corps Committee had provided a ski boat, named 'Jimmy', and outboard motor. It was used off the beach in Vung Tau and many members of the Corps enjoyed the sport - not so for Major Mervyn Ramsay who had his tour of duty as OC 110 Signal Squadron interrupted in October 1969 when the boat ran over him causing considerable injury.

At times personnel turnover was heavy, with 60% of officers changing in the last quarter of 1969 and 20% of the entire unit changing in April 1970.

Squadron equipment varied in quality, the Siemens Halske FM 24/400 microwave and VZ 12K channeling equipment providing excellent service. For a period this equipment had almost no spares backing; imagine the maintenance troop commander's language when one day a technician cooked in a drying oven the only spare in theatre of a particular VZ 12K module! The AN/TRC-24 was a reliable radio relay workhorse, but there were frequency interference problems, the Americans seemed to be operating hundreds of them. The AN/TRC-24 was coupled with the F1830 channeling equipment, which unfortunately had a ringing system incompatible

with the VZ 12K making tandem operation of FM 24/400 and AN/MRC-69 systems a major technical problem.

At the other end of the reliability spectrum was the famous EMU switchboard, which will undoubtedly be one of the Corps' legends. The March 1970 squadron report stated in exasperation **"this board carried the hallmark 'moisture fungus proofed Nov 44'. The board is older than most of its operators; it appears increasingly to resent their attention and the attention of the technicians who minister to its ailments."** Later the EMU was reported to be seeking repatriation benefits for wounds received from its operators, and the operators were said to be claiming compensation for utter exasperation. On a serious note, switchboard equipment just did not meet the needs of the Army in Vietnam. The TC-10 EMU switchboard at Vung Tau was eventually replaced in February 1971 with an AN/MTC-1.

HF radio had a place in the squadron for intra-theatre use as well as for strategic communications. An emergency net Saigon - Vung Tau - Nui Dat existed and was regularly tested. Whenever the Saigon - Phan Rang (where the RAAF Canberra bomber squadron was located) circuit, using a channel in the US Defence Communications Agency system, failed, a Vung Tau - Phan Rang HF link was activated. This occurred frequently in 1970, secure RTT being the mode used when conditions permitted. "HF House" in Vung Tau regularly contacted the famous HMAS Jeparit and HMAS Sydney and occasionally other RAN ships and Army vessels such as Clive Steele and Harry Chauvel. Army vessels normally had RA Sigs operators on board to provide radio communications. On one occasion the HF circuit was phone-patched via the EMU switchboard to the Naval Staff Officer in Saigon.

HF operators and technicians had good reason to beware of tropical thunderstorms - more than once meters were blown clean out of the large transmitters when lightning struck their antennas.

Thunderstorms created other problems in the wet season. The squadron in Vung Tau reported that **"the opening crescendo of the 1970 wet on 26 May 1970 resulted in a few hundred tons of the squadron area moving into 102 Field Workshops below. Last year one six-hole toilet was included as a bonus; this fall almost included the generator shed."**

Carriage of air despatch service and safe hand bags was another important, though little noticed task, with up to 300 bags a month moving around the theatre. When the official bags wore out, they were replaced by the traditional Army 'cricket bag', complete with lock. There was never any lack of volunteers for a courier trip, though some couriers arrived as green as their cricket bags after a rough, wet RAAF Caribou trip in the bumpy tropical air.

Photo 8.4 - Deployment Troop, 110 Signal Squadron setting up at FSPB Bond - AN/TRC-24 Antenna left side of photo with Shelter being dug in (1970).

Members of Deployment Troop were always a keen bunch ready to move with their AN/MRC-69 shelters to fire support bases and other field locations. A few members had a close shave at Horseshoe Hill near Nui Dat in early 1970 when a mortar bomb missed their shelter by a few feet, perforating it with extra ventilation holes.

In April 1970 it was reported from Fire Support Base BOND that ***"troop members provided 14 channels with a system availability of 99.5% and further distinguished themselves by locating a VC bunker. The bunker was fortunately ZGN with respect to VC and booby traps."***

Civic action was 110 Signal Squadron's strong point both in Saigon and Vung Tau. A squadron civic action committee operated with volunteers from all ranks. Some tasks were pleasant and immediately rewarding, such as soldiers from Queensland working with the Vagabond Boys Home group, showing them how to obtain better yields from their banana plantation. Instruction was not all in one direction - one lunch time Vietnamese boys seized a passing dog and demonstrated a speedy conversion into dog sausages, which were consumed with relish. The soldiers preferred to eat bananas however!

Other civic action tasks were heartbreaking, working in the stench of overcrowded orphanages and seeing the deaths of sick children.

The squadron contributed to the welfare and relaxation of the Australian force generally by building the antenna for the Australian Forces Broadcast Station, a very awkward job on a swampy corner of the US Army airfield, and by operating a tape library service for recording of music. The tape service was so popular that a

technician was employed full time with some four of the tape machines operating continuously.

Photo 8.5 - Lt Anthony Roberts, 110 Signal Squadron, DJ shift at AFVT (1970).

A limited private telegram service to Australia was provided using code numbers, an archaic system resurrected from World War Two. If the wrong numbers reached the other end, the message **"Happy Birthday mother"** could end up as **"I am broke - send \$20"**.

One formal honour was awarded to the squadron in the 1969/70 period in the form of an MID for rigger Sergeant Robert Crawford. The riggers rarely had time for relaxation and often had hair-raising climbs. Antennas were alternately sand blasted by the winds, undermined by water and corroded by salt. Another honour unknowingly bestowed on the Saigon element was the routing indicator RAMA for the major relay. The Thai contingent headquarters was near the relay and the Royalist Thai officers pointed out that RAMA the name of the current dynasty of Thai kings.

This was another testing period for the squadron, possibly the best achievement being the high standard of control exercised by squadron officers and senior NCOs from the operations room. This system provided central coordination and supervision continuously for a large, diverse and geographically scattered organisation. Major problems were rapidly addressed at any hour with whatever resources were needed to solve them and usually they were solved quickly.

Task Force Signals

1 ATF operations increasingly involved longer periods away from the Nui Dat base.

In January, 1969 Major Keith Morel took command of 104 Signal Squadron at FSPB JULIA established for Operation GOODWOOD which began a month earlier and from there he went on to FSPB KERRY at the end of the month for another operation concerned with the anticipated enemy Tet offensive in 1969. Then HQ 1 ATF (Main) proceeded directly on Operation OVERLAND to FSB JILLIAN which an infantry battalion had been occupying. This was followed by a redeployment to FSB MARTINE on the way back to Nui Dat. This continuous series of operations finished in April 1969.

Photo 8.6 - Sig Ken Winsor with the 104 Signal Squadron COMM-CEN ACV at FSPB Clare - Note the Shrapnel holes in Landrover windscreen from a mortar attack (1969).

That was the last of the major deployments of HQ 1 ATF (Main) for the year. On one occasion a small element of HQ 1 ATF deployed on an operation to assist an ARVN unit, the Radio Troop Commander, Lieutenant Peter Diddams, was made responsible for the signals detachment.

In December 1969 HQ 1 ATF (Main) deployed to a fire support base north of Nui Dat for 10 days but this was mainly a shake down operation necessary because of many changes of staff since the last deployment of the task force headquarters. The task force headquarters deployed only once for 7 days in April 1970 followed by a short testing exercise in August. With the reduction of the task force to two battalions in November 1970 there was a lower level of operations.

The provision of liaison officer detachments, each of two radio operators, posed quite a strain on the squadron. Since 1 ATF had arrived in Nui Dat there was always a commitment for LO detachments. Task force units were constantly operating with US forces and frequently with ARVN units, with Thai units and with Vietnamese Popular Force and Regional Force units and posts. Liaison officers were essential to avoid misunderstandings and mistakes. On Operation GOODWOOD 104 Signal Squadron had to provide no less than 9 LO detachments - almost a third of the strength of its radio troop.

The LO requirements had other implications for the always tight manpower situation in the squadron. Many radio operators were National Servicemen and they could not have their return to Australia delayed or their discharge procedure could not be effected in time. Their replacements never arrived in advance, they arrived at the time others were being returned or, more usually, a week or two later.

Some squadron officers also did LO duties. Captain Neil Horn, second in command of the squadron in 1969, was for a time the LO in Baria and was awarded a Vietnamese medal for his services. The COMMCEN Officer, Captain David Nichols, was another who did LO duties that year.

Photo 8.7 - COMMCEN Routing Clerk area 104 Signal Squadron - Note the ADS bags (1971).

Further compounding the manpower problem was the requirement for the squadron to provide men for patrols from fire support bases. This was in addition to the patrols around Nui Dat.

Signals personnel in the squadron performed other tasks which proved vital but are not well known, and often not recognized by people outside the Corps as being beyond what the men were trained for. Two excellent examples come from the radio operators. They were often in isolated areas and called down fire support and DUST OFF missions (helicopter casualty evacuation). Then there was the "CP Op" - a highly proficient operator but he needed to be of a special breed because the task force command post staff, in Nui Dat and in fire support bases, expected him to mark

maps, decode and perform other staff tasks, whilst coolly operating the net.

Switchboard operators are always an unsung lot and those on EBONY at Nui Dat were no exception. During the early days they had to contend with the unreliable eyeball indicators and cords of the SB-86's, which were never intended for the service expected of it as the EBONY switchboard. When the TC-10 was installed in 1967 the whole Nui Dat telephone system was changed from magneto to common battery but impatient users were not content with just picking up the handset and so smartly turned the magneto handle of the K Phone. This sometimes caused the line indicator lamp to burn out. All the handles were removed, to the frustration of telephone users.

EBONY switchboard was re-equipped with another board, an AN/MTC-1, on loan from the US 39 Signal Battalion which in turn was eventually replaced with an Australian owned AN/MTC-1 in 1971.

Photo 8.8 (left) - Ebony AN/MTC-1 Switchboard Shelter (AN/MTA-3) with Sig Anthony Campbell (front), Sig Anthony Pool (next) and Sig Peter Smith, 104 Signal Squadron, Nui Dat (1971).

Photo 8.9 (right) - Ebony AN/MTC-1 Control Shelter (AN/MTA-4), 104 Signal Squadron, Nui Dat (1971).

The hard working linesmen seldom get much recognition either. They can get frustrated too as happened in 1969. The line around the base was by this time multi-pair (up to 150 pairs) of underground cable and alternative routes were not part of the system. On one occasion engineers severed a cable and to the dismay of the squadron's linesmen it was found that the cable was not colour coded. It was in an area which was to be the site of the Nui Dat dam so a complete new section of cable

was laid out ready to be put in the trench when a tank neatly severed it again! The underground cable began to have a high fault incidence and in latter half of 1970 replacement with aerial multi-pair cable began.

By now some 15 nets were remotely controlled by radios on the Nui Dat feature. 104 Signal Squadron attended to the radios of other units so that it retained control over the hill. There was a Deeco mast with custom built antenna arrays cut to various frequencies and appearing on a patch panel in the bunker. There was a similar arrangement in the squadron area to provide an alternative for five prime task force nets.

Photo 8.10 - 1 ATF Radio Command Net Mast, Nui Dat Hill (Aug 1971).

Photo 8.11 (left) - Inside the 104 Signal Squadron, Radio Bunker on Nui Dat Hill (Aug 1971).

Photo 8.12 (right) - Inside COMMCN Bunker, beside 104 Signal Squadron HQ building (Aug 1971).

Radio retransmission became increasingly important, especially for SAS patrols where the need for HF radio was eliminated. A retransmission team was located on Hill 837 (Nui Chua Chan) in a US defended locality and resupplied by helicopter from Nui Dat. This ensured excellent VHF communications to the patrols operating deep within Phuoc Tuy Province or outside it.

Photo 8.13 - Hill 837 looking east (February 1970).

The communications centre of 104 Signal Squadron handled a considerable amount of traffic. In May and June 1970 the total of IN and OUT messages exceeded 17,000. Dispatches in each of three months were in excess of 40,000, a level which continued or was exceeded for some months.

Civic action was also undertaken by the task force signal squadron. As early as 1966 repairs to the Hoa Long High School had been undertaken and further help was given in 1970. Later the squadron became responsible for part of a refugee village, Soui Nghe, set up a few kilometres north of Nui Dat. The unit also fostered the Hoa Long Boy Scout troop.

During 1968 and 1969 communications within and to the task force built up to the point where they were highly reliable, flexible and abundant. Quite possibly though RA Sigs has made a rod for its own back as any future conflict may not admit the same lavish scale of equipment nor may the area of operations allow such excellent communications - yet users will expect it. By early 1970 some of the VHF voice command radio nets, were upgraded to the AN/PRC-77 Radio Sets, so secure speech mode using the KY-38 could be used. This solved radio security concerns that had worried RA Sigs personnel since the first deployment to South Vietnam.

Photo 8.14 - AN/PRC-77 Radio Set with its two field Antennas.

Electronic Warfare Support

Electronic warfare was a little known aspect of the Vietnam campaign, and in this regard the campaign was probably no different to other conflicts. A few operators and some officers became aware of the enemy engaging in electronic warfare when they experienced jamming but otherwise only senior commanders generally gave sufficient weight to this enemy activity.

From time to time units of 1 ATF had their radio nets jammed but the enemy technique was simple and the characteristic FM capture effect usually resulted in the wanted signal being received. It had a nuisance value but was seldom effective. However, Lieutenant Colonel P.H. Bennett, CO, 1 RAR at FSPB CORAL, commented later ***"we experienced for the first time in Vietnam (for 1 RAR) the rather terrifying situation of having a local jamming unit on your command net"*** which was quickly overcome by frequency changing. He also remarked that line was laid in CORAL not just for the usual reasons but because ***"it had become pretty obvious to us that all allied nets were being very carefully monitored by the enemy"***.

The enemy gained far more information from intercept operations. 1 ATF and other

forces did not change call signs, codes and frequencies on a daily basis in the belief that the enemy could not react quickly in sufficient strength to take advantage of the information generally concealed by such defensive measures. But there was another practical reason for not making daily changes, this war involved the greatest use ever made of radio so that frequency assignment was a major problem. Even within 1 ATF one frequency would often have to be assigned to more than one net and when units operated with or close to other allied forces interference would often be experienced. Once having got a clear frequency, units preferred to keep it because they felt it was better to have reliable radio communications knowing that the enemy could instantly identify their nets rather than have unreliable communications each time the frequency was changed. Helicopters also added to the problem, as there were assign frequencies many hundreds of kilometres from Nui Dat and be tasked to do a mission in 1 ATF area.

Corporal Denis Hare remembers an incident in 1968, while working in 104 Signal Squadron's Communication Control (COMMCON). Australian Soldiers exercising in SWBTA near Rockhampton in Queensland, VHF radios were being ducted in (over 7,000 kilometres) on one of 1 ATF command radio nets - while a battle was being fought. At first, it was thought the enemy had captured a radio detachment and was forcing the Radio Operators to communicate on the command net or Australians were working with the enemy. Communications was established with the Australians in SWBTA and they gave their location. A message had the radio removed from the tactical command net!

In an effort to reduce information disclosed over radio, radio relay and line, a Signal Detachment from 110 Signal Squadron, and often under command of 104 Signal Squadron, monitored our own circuits and reported on security breaches. However by far the greatest advance in improving communication security was the introduction of speech secrecy equipment (KY-38) for use with the AN/PRC-77 VHF Radio Set.

1 ATF received electronic warfare support from 547 Signal Troop (see Chapter 5). It was administered by 103 and then 104 Signal Squadron but reported direct to HQ 1 ATF. Many commanders of 1 ATF had high praise for the contributions this troop made to successful operations of the task force.

Call Home Service

A "Call Home" service was opened in November 1970. This was probably the first time in the history of Australian Forces overseas that servicemen could telephone their families from a theatre of war.

Four wire telephones were used at Nui Dat, 1 ALSG and 1 Australian Field Hospital in Vung Tau, and Saigon. The connection was made on the Siemens Halske bearer system then via a cable and wireless HF radio circuit to Hong Kong, the SEACOM

cable to OTC in Sydney and finally the local telephone system in Australia to the called party.

There were some technical and administrative teething problems but the system settled down well and was a good morale booster with some 20 to 30 calls being handled a day.

CHAPTER 9 - CLOSING DOWN

Relocation of all AUSTCAN links to Vung Tau

With the national rear link receivers relocated in Vung Tau in late 1969 and the move of the transmitters from Nui Dat to Vung Tau begun in mid-1970, only the Saigon major relay station needed to be moved to concentrate 110 Signal Squadron's major facilities in Vung Tau.

Planning for the move of the MRS was well underway in early 1970. In September the squadron took delivery of six AN/TGC-5AX transmit consoles and six receive/monitor consoles on loan from the US Signal Corps. These were installed in the Saigon MRS in place of the Australian equipment which was then moved to Vung Tau where the old building was being rehabilitated. The squadron undertook the complete change-over and installation from within its own resources and MRS Vung Tau was activated on 30th October 1970 while MRS Saigon closed a few days later.

A notable feature of the campaign was the extraordinarily willing assistance received from the US and the good working relationship between the US and Australian Signal Corps. This came through units of US 1 Signal Brigade which operated five Signal Groups throughout Vietnam and Thailand. It was commanded first by Major General Rienzi and later by Major General Foster, Jr. Lieutenant Colonel Robert Cowley on his last day as CSO HQ AFV in January 1971 was surprised by an unannounced and informal visit by the Major General. Major General Foster wished to pay tribute to his work and make a presentation, indicating the esteem in which Lieutenant Colonel Cowley and all members of the Corps were held by the US Signal Corps.

There were delays in completing the transfer of the transmitters and it was not until January 1971 that the installation was complete and operations began from Vung Tau. The station at Nui Dat remained on standby for another month until the last transmitter was moved and then the horizontal log periodic antenna was also relocated in Vung Tau.

The squadron was supported in the upgrading of its horizontal and vertical log periodic antennas at Vung Tau with a rigger team from 127 Signal Squadron. This team, led by Captain Bill Files, had been working on antennas of 9 ANZUK Signal Regiment in Singapore and no doubt found their sojourn in Vietnam a little different.

Much of the technical work in early 1971 was managed by 110 Signal Squadron Supervisor Technical Telecommunications (STT) Warrant Officer Class One Harold Cook. Harold was a veteran of the Second World War and one of the few Australian soldiers to serve in both wars.

Diagram 9.1 - AFV Communications (January 1971)

By March 1971 US forces were withdrawing steadily and AFV was undergoing similar reductions. Signals units had to make their contribution and most came from 110 Signal Squadron as a result of the relocation of the MRS in Vung Tau. The force reduction had no effect on communications requirements within the force but the load increased. The squadron handled 156,000 messages in May of which 117,800 passed through the MRS, the greatest number ever handled by an RA Sigs MRS in Vietnam.

Circuit availability of the national rear link declined due to propagation conditions and teething problems with the relocated transmitter station and MRS. This caused a continuing dialogue involving HQ AUSTCAN in the Directorate of Signals, CSO AFV, OC 110 Signal Squadron and CO 6 Signal Regiment. The secure telex conference facility provided more than the usual service as a result. By July 1971 a study was being made in Canberra and Saigon to see what alternative circuits might be available.

The monsoon thunderstorms produced more than QRN. In May 1971 a sizeable fireball appeared in the Saigon system control. The CSO, Lieutenant Colonel George Mapson, reported that it *"proceeded to methodically and maliciously*

blow all the fuses it could find, diminishing in size as it went, and burning out a Siemens Halske power supply module. Last seen disappearing up a tag strip in the SYSCON it reappeared in AFV COMMEN where it dissipated itself in an orgy of blown fuses and increased adrenalin." QRN is not always as anonymous and abstract as it sometimes appears in outage reports. Unfortunately there is no Q or Z code for 'I have a fireball in my Syscon!'

Australian Forces to Withdrawn

On 18th August 1971 the Prime Minister announced that the force would be withdrawn. Generally the resulting Plan INTERFUSE required to have the combat elements home by Christmas and as much as the logistic element as was prudent. The signals plan was to maintain the existing communications system as long as necessary and to deactivate it piece by piece as the requirement ceased. Withdrawal of the force through Vung Tau simplified the signals plan.

Perhaps not surprisingly in August the EMU switchboard (Vung Tau) handled an average of 8,000 calls a day - the highest load ever.

Closing Down Task Force Communications

Photo 9.1 (left) - SSgt Kenneth Nicholson, SQMS of 104 Signal Squadron preparing equipment for return to Australia (Aug 1971)

Photo 9.2 (right) - Cpl Raymond Hamerton and LCpl William O'Donnell of 104 Signal Squadron cleaning phones for return to Australia (Aug 1971)

By the end of September 1971 the withdrawal was in full swing with 104 Signal Squadron planning to cease operations by mid-October and 547 Signal Troop relocated on Logan Hill in 110 Signal Squadron's area at Vung Tau. 104 Signal Squadron withdrew with assistance from 110 Signal Squadron; this was not without problems, as many of the assets were fixed and had to be progressively replaced by mobile assets starting some 6 weeks prior to the final evacuation of Nui Dat. The Squadron boarded HMAS Sydney on 6th November 1971 to set up its new home in

Ingleburn. It left a special troop to provide tactical communications for 1 ATF which was now in Vung Tau.

Photo 9.3 - Sgt Ken Mackenzie (left doorway) and other members of 104 Signal Squadron stepping on to the flight deck of HMAS Sydney near Vung Tau - VC Hill in back ground (6 Nov 1971)

Photo 9.4 - Members of 104 Signal Squadron on HMAS Sydney (6 Nov 1971)

Closing Down Force Communications

The alternative rear link was established in October 1971. The final solution was a combination of submarine cable, HF radio links and a number of radio relay systems. It was partly under the control of the US DCA and partly under Australian control. It was a rather marginal link, just acceptable for the low volume of traffic expected.

The HF rear link to Melbourne was closed formally at 0005z 16th December 1971. It had been operating continuously for over 6½ years and carried approximately one and three quarter million messages over the longest HF circuit operating from the theatre.

Meanwhile 110 Signal Squadron, with reduced manpower, welcomed the 20% fall in traffic because of the hectic activities which followed in closing down many facilities and packing equipment to be returned to Australia. Again 127 Signal Squadron provided a small detachment to help.

The MRS and Vung Tau was closed 19th January 1972 and an MRS opened at Saigon - Hindsight would have been handy as the MRS at Saigon need never have been relocated at Vung Tau!

The EMU switchboard was cut over to an SB-86/PT and then finally closed in February 1972. SDS continued in Vung Tau and Saigon until near the end of February whilst the ADS, using a Kiowa helicopter instead of the previous RAAF Caribou flight, continued until 29th February, after the Vung Tau Area COMMCEN closed 0001z 24th February 1972.

Inset Plaque 'LOGAN HILL in memory of 38324 Sig B.A. (Lofty) Logan 145 Sig Sqn KIA 28 Mar 1967'

The last elements of 110 Signal Squadron left Vietnam 12th March 1972 and a new era started, but for less than a year, with the Australian Army Assistance Group Vietnam (AAAGV).

Australian Army Assistance Group Vietnam - Signal Detachment

Diagram 9.2 - HQ AAAGV Rear Link (Dec 71 to Dec 72)

Signal personnel manned the AAAGV COMMCEN using three shifts of three (two operators and one technician). The communications back to Australia were very hard to maintain with problems always at sunrise and sunset.

Signalman David Winch detailed an incident with a code change. ***"One time when we met the other end in lowers, with a bloody terrific circuit, we couldn't get the correct card number agreement from the other end. When we finally worked out the people at the other end were not even using the right book we asked who they were - the other end informed us they were the 'American Communication Contingent at the Paris Peace talks in France'. Signalman Reg Napper and I nearly fell over!!! What happened was in the American SYSCON Shelter in Clark, some-one had plugged us into the wrong circuit"***

Photo 9.6 - Sig Peter Cunnington preparing a message in AAAGV COMMCEN with Sapper Reg Dennis looking at camera - Black curtain behind Peter is offline cipher area with vault and online cipher equipment in same location (1972)

The detachment maintained communications until 17th December 1972, when the Australian circuit was closed and the detachment plus other Australian service personnel were recalled to Australia by the new Labor government.

RESRICTED SIGS67691 FOR CSO

ON THE OCCASION OF THIS CMM THE LAST MESSAGE TO PASS FROM AUSTRALIAN TO SOUTH VIETNAM OVER THE DIRECT HF RADIO CIRCUIT CMM RA SIGS MAY FEEL JUSTLY PROUD OF ITS RECORD IN MAINTAINING SUCH A HIGH STANDARD OF CONTINUOUS SERVICE ON THIS DIFFICULT CIRCUIT. OVER THE SIX AND A HALF YEARS OF OPERATION APPROXIMATELY ONE AND THREE QUARTER MILLION MESSAGES HAVE BEEN PASSED AND DELIVERED TO ADDRESSEES. THIS OCCASION MARKS THE END OF AN ERA IN SIGNALS HISTORY AND NO DOUBT THE CORPS STILL WILL GO ON TO EVEN GREATER DEEDS IN THE FUTURE.

FOR D SIGS/CO/OC FROM CSO

THIS IS THE FINAL MESSAGE TRAMITTED OVER THE HF RADIO LINK FROM VUNG TAU TO MELBOURNE. THE REAR LINK HAS BEEN A PART OF RA SIGS HISTORY SINCE THE BEGINNING OF AFV. DESPITE MANY PROBLEMS IT HAS FUNCTIONED EFFICIENTLY AND HAS PROVIDED CHANNELS FOR MILLIONS OF MESSAGES OVER THE SIX YEARS HAS BEEN OPERATING. THE SUCCESS ACHIEVED IS FITTING TRIBUTE TO THE SKILL AND DEDICATION OF UNITS AND PERSONEL INVOLVED IN ITS ENGINEERING AND TRAFFIC MANAGEMENT. FOR THE CLASS OF EQUIPMENT AND THE PATH LENGTH IT WILL ALWAYS REMAIN AN OUTSTANDING EXAMPLE OF ACHIEVEMENT IN HF RADIO ENGINEERING. CONGRATULATIONS TO BOTH UNITS INVOLVED. ON BEHALF OF COMD AND STAFF XXX XXX XXX XXX XXX XXX PROVISIONING OF COMMUNICATIONS BETWEEN AUSTRALIA AND SOUTH VIETNAM. FOR D SIGS FROM CSO WITH XXX XXX. INT

DATE: **14/12**

XXX = illegible part of message

Note: The last circuit message from Vietnam was transmitted on the 17 December 1972 by AAAGV (Signal Detachment) noting that 1,790,000 messages had been transmitted over the circuit since it had been established by 709 Signal Troop on 30 June 1965.

CHRONOLOGY - RASIGS IN VIETNAM

DATE	EVENT
3 August 1962	Captain B. R. Tinkler arrives in South Vietnam to serve with AATTV - First member RA Sigs deployed in the war.
1963-1964	RA Sigs re-organised and re-equipped with US Radios (AN/PRC-25, AN/VRC-12 and AN/TRC-75) and Shelter Equipments.
8 July 1964	Warrant Officer Class Two Kevin Conway becomes the first Australian to die on active service in South Vietnam.
10 November 1964	The Prime Minister announces introduction of national service to increase the Army's strength from 22,750 to 37,500.
April 1965	2 Signal Regiment in Watsonia, Victoria, received warning order to form a composite troop of 50 to move to a concentration area in Ingleburn, NSW - The start of the deployment of 709 Signal Troop to South Vietnam.
29 April 1965	The Prime Minister announces the dispatch of an infantry Battalion to South Vietnam, with an armoured personnel carrier (APC) troop, a signals troop and logistic support company.
25 May 1965	Captain Twiss, OC 709 Signal Troop, arrives in Saigon with small Force reconnaissance party.
June 1965 (Early)	709 Signal Troop advance party arrives in Saigon by RAAF C130 aircraft - 7 members in South Vietnam with two AN/TRC-75's and four Generators.
June 1965 (Next day)	First communications (CW) by 709 Signal Troop to Australia (6 Signal Regiment - Melbourne, Victoria) day after arrival.
8 June 1965	Main body of 709 Signal Troop arrive in Vung Tau, South Vietnam with the bulk of the 1 RAR Group on HMAS Sydney.
30 June 1965	First intake of National Servicemen starts recruit training in Australia.
July 1965 (Mid)	709 Signal Troop having trouble manning rear and forward links (Saigon) and providing services to 1 RAR Group at Bien Hoa.
July 1965 (Mid)	Major W.R.T. Bodger sent to South Vietnam to assess the Signals situation.
14 Sept 1965	527 Signal Troop arrives with 2 nd Lieutenant Jock Lonie and 29 NCO's and other ranks to assist 709 Signal Troop.
October 1965 (Late)	HQ AAFV moved into the Free World Military Assistance Organisation building - New Communications Centre required but installed to fixed station standards by detachment from 127 Signal Squadron.
November 1965	104 Signal Squadron raised for service in South Vietnam at Wacol, Brisbane, Queensland.
December 1965	103 Signal Squadron raised by 1 Signal Regiment for deployment to South Vietnam at Ingleburn, Sydney, New South Wales.
April 1966	Australian forces in South Vietnam increased to a Task Force (1 ATF) with two battalions with supporting combat units plus RAAF Iroquis helicopters, Caribou Transport aircraft and Canberra bombers. Also RAN maintained a destroyer on station off Vietnam.
1 April 1966	First elements of 145 Signal Squadron arrived in South Vietnam. - 145 Signal Squadron included a HQ Troop, 506, 520, 552, 527, 581 and 709 Signal Troop's. Note: 527 and 709 Signal Troop's already in South Vietnam.

DATE	EVENT
May 1966 (Early)	103 Signal Squadron, commanded by Major P.D. Mudd, arrive in South Vietnam by air and HMAS Sydney and set up at Back Beach, Vung Tau.
26 May 1966	First National Serviceman KIA.
June 1966 (Early)	103 Signal Squadron deploys to Nui Dat by road and Chinook helicopters.
June 1966	The Australian signal centre and switchboard at Bien Hoa closed and SDS from Saigon to Bien Hoa ceased.
4 June 1966	Concentration of 1 ATF at Nui Dat is completed.
8 June 1966	547 Signal Troop advance party arrives in Vung Tau.
14 June 1966	547 Signal Troop arrives and deploys to Nui Dat.
17 June 1966	3 SAS Squadron with its Signal Troop from 152 Signal Squadron deploy to Nui Dat.
24 June 1966	547 Signal Troop starts EW operations.
July 1966 (Mid)	145 Signal Squadron installed VHF radio relay trunks using the AN/MRC-69 system interconnected HQ AFV at Cholon to 1 ALSG at Vung Tau via a repeater at VC Hill in the Vung Tau area. Another link from Nui Dat to Vung Tau provided channels from HQ 1 ATF to 1 ALSG and HQ AFV.
7 July 1966	Communications centre opened at Vung Tau by 581 Signal Troop (part of 145 Signal Squadron). At Nui Dat, the task force signal squadron (103 Signal Squadron) opened its communications centre, along with cipher, radio, switchboard and SDS services.
29 July 1966	547 Signal Troop detect enemy 275 Regiment transmitter moving towards Nui Dat.
14 August 1966	547 Signal Troop detect enemy 275 Regiment transmitter in the area of Long Tan.
18 August 1966	Battle of Long Tan - Task Force, 6 RAR and Artillery Command Radio Nets provided good communications to support the battle.
January 1967	SAS RA Sigs members now Detachment 152 Signal Squadron. Note: 152 Signal Squadron part of SAS Regiment.
March 1967	139 Signal Squadron raised as a reinforcement unit for 104 Signal Squadron at Enoggera, Brisbane.
March 1967	Elements of 110 Signal Squadron, commanded by Major E.H. Hynes, arrived to begin the relief of 145 Signal Squadron and by end of May, 110 Signal Squadron had taken over all responsibilities for force signals.
28 March 1967	Signalman B. A. Logan of 552 Signal Troop, 145 Signal Squadron KIA whilst attached to US 11 ACR on Operation PORTSEA.
16 April 1967	104 Signal Squadron Farewell Parade part of the Corps Day Parade by 4 Signal Regiment, 7 Signal Regiment and 129 Signal Squadron at Wacol.
April 1967	104 Signal Squadron deploys to Vietnam under the command of Major G.L. Lawrence to replace 103 Signal Squadron at Nui Dat and takes over the 1 ATF signals communications.
July 1967	Signalman Reginald Armstrong from 104 Signal Squadron WIA at FSPB Bill near Thau Tich, while working as a LO Radio Operator, with the US Army 1 Bde HQ.
August 1967	547 Signal Troop starts ARDF missions in Cessna 180A aircraft.
9 August 1967	Corporal D. J. Donnelly of 104 Signal Squadron accidentally killed cleaning F1 Sub Machine Gun in unit lines at Nui Dat.

DATE	EVENT
September 1967	6 Signal Regiment (Melbourne, Australia) converted their end of the link to AFV to fully automatic operation.
6 May 1968	Viet Cong force reached the north west corner of the Phu Tho compound (Saigon) and rear link communications to Australian cut.
11 May 1968	The AUSTCAN Receiver Station located at Long Binh (with US STRATCOM receivers) was attacked with 120mm rockets. Signalman James Cole 110 Signal Squadron WIA.
12 May 1968	Elements of 104 Signal Squadron with advance party of HQ 1 ATF deployed to FSPB Coral.
13 May 1968	Main body of 1 ATF arrives at FSPB CORAL to bring the 104 Signal Squadron signals group to 51 including two 3 man detachments from 110 Signal Squadron and the 7 man detachment of US 53 Signal Battalion. Signalman Rowan Gamble 104 Signal Squadron WIA.
16 May 1968	Signalman A.H. Young from 104 Signal Squadron KIA at FSPB Coral and two other 104 Signal Squadron Signalmen WIA (John Koosache and Ian Crosthwaite).
1 June 1968	Signalman John Veall from 110 Signal Squadron WIA at the Canberra BEQ in Saigon.
August 1968	110 Signal Squadron relocated its HQ and Q Store from Saigon to Vung Tau.
9 August 1968	AUSTCAN Transmitter Station installed and began continuous operation from Nui Dat.
29 September 1968	Signalman D. E. Abraham from 104 Signal Squadron, KIA near Blackhorse (Long Khanh Province) in US Huey Helicopter.
September 1968	AUSTCAN Receiver Station installed and operating Type 1 Rhombic Antennas at Long Binh.
October 1968	547 Signal Troop deploys experimental DF equipment at Nui Dat. Known as 'The Cell'.
November 1968	104 Signal Squadron deploys COMMCEN to FSPB Lion in ACV for the first time.
27 December 1968	104 Signal Squadron started section patrols for one or two days outside the 1 ATF base perimeter.
6 May 1969	Warrant Office Class Two M.W.T. Gill a member of RA Sigs KIA while serving with AATTV. Warrant Office Class Two Simpson received the Victoria Cross trying to save Gill.
November 1969	AUSTCAN Receiver Station relocated from Long Binh to Vung Tau.
February 1970	547 Signal Troop new ARDF equipment located in Pilatus Porter aircraft.
June 1970	104 Signal Squadron patrol under the command of SSM WO2 A.B. Huston engage 20 enemy 4 kilometres east of Nui Dat.
25 August 1970	Signalman S. T. Moore from 110 Signal Squadron dies of neuroblastoma in Repatriation General Hospital, Heidelberg, Victoria after becoming ill in Vietnam in September 1969.
September 1970	Signalman D. A. B. Wallis from 110 Signal Squadron returns to Australia and died on the 17 March 1972 in the Repatriation General Hospital, Heidelberg, Victoria.
30 October 1970	MRS Vung Tau activated with MRS Saigon closing a few days later.

DATE	EVENT
November 1970	Call home service opened for Australian Soldiers using 4 wire telephones.
January 1971	AUSTCAN Transmitter Station relocated from Nui Dat to Vung Tau.
February 1971	EMU Switchboard (Vung Tau) TC-10 replaced with an AN/MTC-1.
May 1971	110 Signal Squadron handled 156,000 messages of which 117,800 passed through the MRS, the greatest number ever handled by RA Sigs MRS in Vietnam.
August 1971	EMU Switchboard handled an average of 8,000 calls a day - the highest load ever.
August 1971	547 Signal Troop relocate to Vung Tau with only the ACV detachment remaining at Nui Dat.
18 August 1971	The Prime Minister of Australia announced that the Vietnam Force would be withdrawn.
Mid October 1971	104 Signal Squadron relocated to Vung Tau with a few detachments remaining at Nui Dat to help complete the withdrawal.
October 1971	Last members of Detachment 152 Signal Squadron (SAS) leave Vietnam.
17 October 1971	547 Signal Troop - AVC last vehicle to leave Nui Dat.
6 November 1971	104 Signal Squadron main body boarded HMAS Sydney for the return trip to Australia and its new home in Ingleburn.
13 December 1971	547 Signal Troop stops operations in South Vietnam.
16 December 1971	HF rear link to Melbourne was formally closed at 0005z after 6 ¹ / ₂ years of continuous operations and carrying 1.3 million messages.
23 December 1971	547 Signal Troop departs South Vietnam for Australia.
19 January 1972	MRS Vung Tau closed and reopened in Saigon. EMU switchboard cut over to SB-86/PT.
1 February 1972	Vung Tau Area COMMCEN (110 Signal Squadron) closed at 2400z.
February 1972	AUSTRALIAN ARMY ASSISTANCE GROUP VIETNAM (AAAGV) - Signal Detachment formed and starts taking over communications to Australia from 110 Signal Squadron.
February 1972 (Late)	EMU switchboard (110 Signal Squadron) closed.
29 February 1972	SDS and ADS (110 Signal Squadron) discontinued.
12 March 1972	110 Signal Squadron leaves Vietnam.
17 December 1972	Last message transmitted from South Vietnam by AAAGV. Total of 1,790,000 messages transmitted by RA Sigs during the war.
18 December 1972	Australia's military commitment to South Vietnam ends with AAAGV leaving Vietnam, with its Signal Detachment.
30 April 1975 (Noon)	North Vietnam Army tanks smash through the gates of the presidential palace in Saigon - The war is over.
18-24 November 1979	The remarkable and striking painting 'Signals in Vietnam' is hung in the foyer of the School of Signals at Watsonia and dedicated by Brigadier K. P. Morel during RA Sigs Corps Week.
3 October 1987	25,000 men and women of the Australian Vietnam Veterans community march through Sydney, which marked their 'Welcome Home' from Vietnam.
3 October 1992	Australian Vietnam Forces National Memorial is dedicated at its sacred site on ANZAC Parade in Canberra.

DATE	EVENT
19 August 2008	Royal Australian Corps of Signals Vietnam Plaque dedicated at the Australian War Memorial. The Plaque is located in position number 157 on the southern side of the pathway linking the main car park to the Western Courtyard.

LIST OF TERMS

1 ALSG	1 st Australian Logistic Support Group.
1 ATF	1 st Australian Task Force.
11 ACR	11 th Armored Cavalry Regiment (US Unit based at Blackhorse). Motto "Find the bastards – then pile on"
173 Abn Bde	173 rd Airborne Brigade (US Army Unit in which 1 RAR Group was attached). Nickname 'The Herd'.
1 Sig Bde	1 st Signal Brigade (US Army Unit providing communications to all of Vietnam). It operated five Signal Groups throughout Vietnam and Thailand.
AAAGV	Australian Army Assistance Group Vietnam - Final Australian organisation in Vietnam (1972) which included a Signal Detachment.
AATTV	Australian Army Training Team Vietnam (The most highly decorated unit in the Australian Army).
AAFV	Australian Army Force Vietnam.
Ablution Block ACP 125	Toilets and Showers US Operating procedures that replaced the pre Vietnam 'Signal Training All Arms Pamphlet 7' (based on British procedures).
ACV	Armoured Command Vehicle.
ADS	Air Despatch Service.
AFVT	Australian Forces Vung Tau. Radio broadcast station run by the RAAF at Vung Tau for Australian Forces.
AFV	Australian Forces Vietnam.
AK	Accidentally Killed (on Active Service).
AN/GRA-39	Remote transistorized, battery-operated equipment for AN/PRC-25 (AN/PRC-77) and other Radio equipment - It enables an operator to transmit and receive voice communication through a radio set from a distance up to 3.2 km remotely.
AN/GRC-106	Field 400 watt HF Radio Set - It operates on CW and USB, full coverage from 2 to 30MHz. It's synthesizer has a crystal oven for ultra high stability. It emits 400W PEP on USB and 120W on CW. The GRC-106 consists of a RT-662 receiver exciter (bottom) and a AM-3349 linear amp (top). A modem unit can be connected for RTTY applications.

AN/MGC-17	Teletypewriter Central Office, Voice frequency telegraph, 12 lines, Major components: SB-22, 3 x TH-5 or TH-22, 6 x CV-425 or TA-182, TA-312, TT-4, TT-76 and 2 x KW-7 (normally terminates 1 x Duplex Circuit) - TM 11-5815-205-14.
AN/MRC-69	Radio Relay Shelter using the AN/TRC-24 VHF/UHF Radio Equipment. Carrier equipment was the F1830, which was different to the USA version.
AN/MTC-1	Manual Telephone Central Office, 196 local or common battery line and 20 trunk lines, Major components: AN/MTA-3 (Switchboard Shelter) and AN/MTA-4 (Control Shelter) - TM 11-5805-284-14.
AN/MTC-7	Small Switchboard Shelter (1 x SB-86/PT) - 60 lines max.
AN/PRC-25	Man pack VHF Radio Set, 30-76MHz, 920 channels, 50kHz spacing, FM, 1-2 watts, 12VDC from BA-4386 mil-type battery.
AN/PRC-47	Man pack HF Radio Set (very large man pack load) - Full coverage synthesized from 2 to 12MHz. It emits 100W PEP (low power 20W), on either CW or USB. An FSK converter allows the use of RTTY.
AN/PRC-64	Small HF Radio Set normal only used by SAS in Vietnam - Built by Delco in the US in the sixties. Fully solid state, designed for field use, but there is no facility for use on the move. Only wire antennas are provided. Both transmitter and receiver are crystal controlled. Output power is about 5 watts. Frequency coverage is 2.2 to 6 MHz.
AN/PRC-77	Fully transistorised updated version of the AN/PRC-25 design. It also had a wideband mode for secure operations with the TSEC KY-38 speech security equipment.
AN/TGC-5AX	Transmit/Receive/Monitor HF Consoles.
AN/TRC-75	Medium power HF Radio Set, Vehicular, 2-30 MHz, 1 KW, AM, SSB, CW (Vehicular version of ARC-58) Consists of R-761, T-730, C-3341, CU-749, C-2848, AM-2306 and CV-786.
AN/VRC-12	Vehicle mounted FM VHF Radio Set Series - Short-range VHF, vehicular, aircraft, and fixed-station mounted units. Receiver-Transmitter RT-524/VRC is the major component of the AN/VRC-12 series radio configuration. The RT-524 frequency range is 30 to 75.95 MHz and it is equipped with a built-in loudspeaker. High power output is 35 watts. AN/VRC-46 and AN/VRC-49 are two configurations of the AN/VRC-12 series.
ANZUK	Australian. New Zealand and United Kingdom.
ARDF	Airborne Radio Direction Finding.
ARVN	Army of the Republic of Vietnam.
AUSTCAN	Australian Communications Army Network.

BAUDOT	Telegraph transmission code using five bits for character representation with one start and one and a half stop bits.
BEQ	Bachelor Enlisted Quarters. Accommodation in Saigon for Australian Soldiers was in a old Vietnamese Hotel named the 'Canberra BEQ'.
C11/R210	HF Radio Set C11/R210 was developed for medium range HF communication and primarily operated by signals. A set comprised four units: Transmitter C11, Receiver R210, Power Supply Unit and Tuner RF Antenna No. 7. The set has frequency coverage of 2-16 MHz in 3 ranges and facilities are provided for amplitude modulation speech, CW Morse and frequency shift keying. The RF output is 50 watt on high power and 5-10 watt on low power.
C130	Four engine Hercules tactical transport aircraft. Flights to and from Vietnam by RAAF 36 and 37 Squadrons.
C42/C45	VHF Radio Sets. The C42 and the C45 are 1950s vintage VHF transmitter-receiver sets. The C45 cover low band VHF and the C42 covers high band VHF. These radios generally used in vehicular applications such as in tanks and LandRovers. Not being synthesised, they tend to drift severely and have a reputation for a very broad transmission. These radios were used in the Centurion Tanks during the war and caused many headaches for communication planners, because of their tuning/non compatibility with the more modern US VHF radios used by RA Sigs during the war.
Caribou	De Havilland Canada DHC-4A (RAAF) - STOL tactical transport aircraft - Two flight crew plus 32 troops. Callsign 'Wallaby'. Nickname 'Wallaby Airlines'.
CB	Common Battery - Signaling used with field telephone system.
Centurion	Main Battle Tank MK V/1 (Aust) weighting 54 tonnes. They provided intimate direct fire support to the infantry and with shock action and devastating fire power provided the Australian Forces with a definite edge against fortified Viet Cong positions and also in defensive roles in their four years in Vietnam. Many variants of the Centurion were available including bridgelayer, tank dozer and an armoured recovery vehicle. See C42/C45 also.
Cessna 180A	Cessna 180A observation and liaison aircraft - Seating for four, usually one or two - Used with early ARDF equipment by 547 Signal Troop. Callsign 'Possum'.
Chieu Hoi	Open arms program run by the South Vietnamese Government allowing VC or NVA carrying a Chieu Hoi leaflet to surrender and get better treatment than soldiers captured on the battlefield.
Chinook	CH-47 medium lift twin-rotor cargo helicopter. Not in service with the RAAF during the Vietnam war.

Clive Steele	AV1356 Clive Steele, 1000 ton Landing Ship Medium (LSM) - Operated by 32 Small Ship Squadron, Royal Australian Engineers (RAE).
CO	Commanding Officer.
COMMCEN	Communication Centre. Also "COMCEN".
Corps	Royal Australian Corps of Signals.
CP	Command Post.
CP Op	Command Post Operator.
CSO	Chief Signals Officer.
CW	Continuous Wave.
D10	Common name for Cable Telephone WD-1/TT - A general purpose field cable for telephone and telegraph circuits. - Range 19 Km for 19dB loss.
Dannet	Free standing coiled barbed wire.
DCA	(US) Defense Communications Agency.
DCS	(US) Defense Communications System.
Deeco mast	Common name for Mast Triangular Lattice 22m - Used standard mast sections (1.83m) that bolt to together as require.
DF	Direction Finding - The process of determining the bearing of an electromagnetic emission.
DR	Dispatch Rider.
Ducting	Meteorological conditions. Ducts can cause radio waves to propagate to anomalously long or short ranges. Radio waves can be trapped in a duct and propagate along a path following the curvature of the earth's surface, instead of travelling in a straight line.
Duplex mode	Operations of a common communication link where transmissions are possible in both directions at the same time.
DUST OFF	Radio callsign of casualty evacuation helicopters normally a 'Huey'.
E514 or E513	Australian made High Powered (5Kw) High Frequency (HF) manual tuned Transmitters. The E514 had a lower frequency range (2.5Mhz) then the E513 (3.5Mhz). Both used 4 x 3J160E valves in parallel pull-pull in the final stage.

EBONY	Switchboard designation for 1 ATF at Nui Dat (103 then 104 Signal Squadron's).
EMU	Switchboard designation for 1 ALSG at Vung Tau (145 then 110 Signal Squadron's).
EW	Electronic Warfare - The military action involving the use of electromagnetic energy to determine, exploit, reduce or prevent hostile use of the electromagnetic spectrum and action which retains friendly use of the electromagnetic spectrum.
F1830	FDM (Frequency Division Multiplexing) carrier equipment use with the Radio Equipment AN/TRC-24 in the Australian AN/MRC-69 Radio Relay Shelter.
FFV	US Headquarters - Field Force Vietnam. Command subordinate to MACV (Military Assistance Command (South) Vietnam) that exercised direct control over all US Forces. Army units operating in particular corps tactical zone. Field Force I commanded II Corps and Field Force II commanded III and IV Corps (including 1 ATF).
FM 24/400	Siemens Halske commercial microwave Radio Relay System - 12 or 24 channel, 400MHz.
FSPB	Fire Support Patrol Base or Fire Support Base (FSB).
FWMAO	Free World Military Assistance Organisation.
Harry Chauvel	AV1353 Harry Chauvel, 1000 ton Landing Ship Medium (LSM) - Operated by 32 Small Ship Squadron, Royal Australian Engineers (RAE).
HE	High Explosive.
HF	High Frequency.
HMAS Jeparit	Ship used to resupply AFV - HMAS Jeparit did 43 voyages to South Vietnam. Term used by many Australian Soldiers during the war "on the next Jeparit".
HMAS Sydney	Old aircraft carrier used to ferry troops and equipment to and from Vietnam - Also known as the Vung Tau Ferry. The Vung Tau Ferry did 22 voyages as a troopship to South Vietnam.
HQ	Headquarter.
Huey	Common nickname for the Bell UH-1B (UH-1H) Iroquois utility assault and gunship Helicopter (RAAF). Utility helicopters used the callsign 'Albatross' and gunships used the callsign 'Bushranger'.
JTC	Jungle Training Centre - Australian Army base in Canungra, Queensland where Australian soldiers did their final three-six weeks battle efficiency training before leaving for Vietnam.

K Phone	Australian made field general purpose telephone. Design for operation in forward areas under all climatic conditions. Working range 16 km on WD-1/TT (D10).
KIA	Killed in Action.
Kingstrand Hut	Pre-fabricated steel huts - normally built on a concrete slab.
Kiowa	Bell OH-58A Light observation helicopter (Army) - Seats for five, including the pilot - Leased Kiowa's replaced Sioux helicopters early in 1971. Callsign 'Possum'. Australian built version is the Bell 206B.
Kleinschmidt	Manufacturer of telegraph equipment - See TT-4/TG and TT-76/GGC.
LO	Liaison Officer.
LUP	Lay up position.
Lowers	Slang for plain text. Cipher equipment code door open.
LPA	Log Periodic Antenna
M577-A1	See ACV.
Magneto	Telephone signaling using hand generated current.
Ma Rung	Vietnamese term 'phantoms of the jungle'.
MID	Mentioned in Despatches.
Montagnards	Montagnards (French for "mountain people") are the members of more than 30 primitive societies located mainly in the mountainous, forested spine separating Vietnam and Laos.
MRS	Major Relay Station.
Napalm	Jellied petrol firebomb.
NCO	Non-Commissioned Officer, eg Corporal.
NVA	North Vietnamese Army.
OC	Officer Commanding.
OTC	Overseas Telecommunications Commission (Australia).
OTLP	One Time Letter Pad – Used for the encryption of radio transmissions.
OMC	Owen Machine Carbine - Australian designed and made 9mm sub-machine gun.
Pilatus Porter	Pilatus PC-6 Turbo Porter STOL Light utility observation and liaison aircraft (Army) - Two crew and six passengers. Callsign 'Possum'.

Pronto	Radio appointment title for 'Signals' - low grade security.
QRN	Q Code - I am troubled by static (used with morse code).
US	United States of America.
USAF	United States Air Force.
R-391/URR	HF Radio Receiver.
R5232	HF Radio Receiver.
RA Sigs	Royal Australian Corps of Signals.
RAAF	Royal Australian Air Force.
RAN	Royal Australian Navy.
RAR	Royal Australian Regiment or Battalion if number in front.
RC-292	VHF field antenna system - The RC-292 is a general purpose, stationary, ground-plane antenna used to increase the transmission/reception range of tactical FM radio sets. The radiating and ground plane elements must be adjusted to the proper length for a particular operating frequency.
RT-524	The receiver/transmitter of the vehicular borne AN/VRC-12 series VHF equipment.
RTT or RTTY	Radio TeleType.
SAL Block	Toilets - Ablutions.
SAS	Special Air Service (Regiment).
SB-22/PT	Manual telephone switchboard, Tactical, Portable, 12 Line, 2-wire, Local battery (2 BA-30), 90 VAC 20 Hz ringing - TM 11-5805-262-12.
SB-86/PT	Manual telephone switchboard, Tactical, Portable, 30 Line, 2-wire, Local battery (5 BA-200 + 4 BA-30), 90 VAC 20 Hz ringing, Major components: SB-248, TA-207 and PP-990 - TM 11-2134 or 11-4134.
SDS	Signal Despatch Service.
SEACOM	Coaxial cable in the 1960's between Singapore and Hong Kong.
Shelter	Packaged communication equipment in pre wired aluminum housing that is transportable either by vehicle or aircraft.
SIGCEN	Signal Centre.

Simplex mode	One-way link transmission - Receive then Send.
Sioux	Bell 47G-3B Utility and Training Helicopter (Army) - One pilot and up to two passengers. Callsign 'Possum'.
SO Sigs	Staff Officer Signals (Senior Signals Officer HQ 1 AFV).
SOI	Standard Operation Instructions.
SOP	Standard Operation Procedures.
Spiral 4	Field Quadded Cable with four conductors - Quadded cable formed of multiples of quads, paired and separately insulated, and contained under a common jacket.
Spooky	AC47 (DC3) aircraft equipped with illumination and six machine guns (normally gattling guns). Also called Puff the Magic Dragon (so named after the saccharine song of the same name).
Squadron	Group approximately the size of a company (100+ men).
SQMS	Squadron Quartermaster Sergeant. A senior NCO with responsibility for the stores aspects of a signals unit.
SSB	Single Side Band.
SSM	Squadron Sergeant Major - A warrant officer responsible, among other things, for good order and military discipline.
STRATCOM	The U.S. Army Strategic Communications Command (STRATCOM) was the major field command serving as the single manager directly controlling the Army portion of the global Defense Communications System (DCS), under the Defense Communications Agency (DCA).
STT	Supervisor Technical Telecommunications. A senior NCO with responsibility for the Technical aspects of a signals unit.
SYSCON	System Control.
TAOR	Tactical Area of Responsibility.
TC-10	200 Line switchboard first used in the Second World War.
Tet	Lunar New Year, the most important Vietnamese holiday.
TF	Task Force - Group approximately the size of a military brigade.
Troop	Group approximately the size of a platoon.
TT-4/TG	Teletypewriter, Lightweight, Portable, Keyboard and printer, 20/60 ma loop, half or full duplex, 60, 66, 75 or 100 wpm, 105-125 VAC 50-60 Hz - TM 11-5815-206-12 (Kleinschmidt).

TT-76/GCC	Teletypewriter, Lightweight, Transportable, Keyboard/Transmitter-distributor and printer/paper-tape punch, 20/60 ma loop or polar, half or full duplex, 60, 66, 75 or 100 wpm, 115 VAC 50-60 Hz - TM 11-5815-238-10 (Kleinschmidt).
VC	Viet Cong. Also 'Victor Charlie'.
VHF	Very High Frequency.
VZ 12K	Siemens Halske Channeling equipment.
ZGN	Z Code - When was I last heard?
ZKJ	Z Code - Close down.

LIST OF LOCATIONS

Ba Queo	Suburb of Saigon near Tan Son Nhut airport. Location of Australian HF Receivers.
Balcombe	Suburb of Melbourne, Victoria, Australia. Location of the School of Signals (RA Sigs) until late 1960's.
Baria	In the south-west corner of Phuoc Tuy Province, South Vietnam and is the province capital and largest town. Population 17,000 including hamlets on the west bank of the Song Dinh (river) (1968).
Bearcat	Royal Thai Army/American base on highway 15 near Long Binh in Bien Hoa Province. Used as a VHF retransmission site for some 1 ATF operations.
Bien Hoa	City on the Dong Nai River, Saigon. The city is on a main railroad; manufactures include rubber and timber products, tiles, and pottery. The military airfield at Bien Hoa was the site of the initial buildup of United States air power following the Tonkin Gulf incident of 1964. During the Vietnam War (1959-1975), Bien Hoa was headquarters for the surrounding military region. 1 RAR Group (Det 709 Signal Troop) located with the 173 Airborne Brigade at Bien Hoa 1965.

Blackhorse	American base in southern Long Khanh Province, 30 kilometres north of Nui Dat - Home of the US 11 ACR. Their motto 'Find the bastards - then pile on'. Used as a VHF retransmission site for some 1 ATF operations.
Canberra	Capital City of Australia. Australian Army (Defense) HQ and 135 Signal Squadron location.
Canungra	Location of the Jungle Training Centre - Australian Army base in Queensland where Australian soldiers did their final three-six weeks battle efficiency training before leaving for Vietnam.
Cholon	Suburb of Saigon. Location of HQ AAFV and 709 Signal Troop in 1965.
Clark Air Base	Large USAF Base in the Philippines.
Courtenay's Plantation	Old French rubber plantation to the north of Nui Dat, Phuoc Tuy Province, South Vietnam.
Da Nang	City, east central Vietnam, on Da Nang Bay of the South China Sea, near Hue in Quang Nam Province. A major port and an air and naval base, Da Nang was the site of one of the first landings of U.S. troops in Vietnam. An immense military complex grew up near the city, and Da Nang's population increased greatly in the late 1960s and early '70s.
Duc Thanh	On route 2, 15km north of Nui Dat, Phuoc Tuy Province, South Vietnam
Enoggera	Australian Army base in Brisbane, Queensland, Australia. 104 Signal Squadron deployed to South Vietnam from this base in 1967. 139 Signal Squadron raised in 1967 and located during the Vietnam war.
Gospers	Exercise area in the Blue Mountains (north of Sydney), New South Wales, Australia. 1 RAR Group (including 709 Signal Troop) exercise area before deployment to South Vietnam.
Guam	Territory of the USA. Extensive military installations in mid Pacific.
Hiep Thanh	Near Hue, South Vietnam.
Hill 837	Nui Chua Chan (Hill) east of Xuan Loc, Long Khanh Province, South Vietnam. VHF retransmission site for 1 ATF and US operations.
Hoa Long	4.5 kilometres northeast of Baria on Route 2 near Nui Dat, Phuoc Tuy Province, South Vietnam.
Ingleburn	Australian Army base near Sydney in New South Wales, Australia. 103 Signal Squadron raised in 1965 by 1 Signal Regiment for deployment to South Vietnam.

Khe Sanh	Site of a siege of US Marines and South Vietnam Rangers in 1968 near the DMZ (demilitarized zone - seventeenth parallel). Lasted 77 days.
Kontum	Town, central South Vietnam, in the Annam highlands. 40 kilometres north of Pleiku, in Kontum Province, South Vietnam.
Long Binh	Fifteen miles North of Saigon and was a massive American Logistical complex. Location of Australian HF Receivers.
Long Son Island	North of Vung Tau and south-west of Baria in Vinh Ganh Rai (Bay), Phuoc Tuy Province, South Vietnam.
Long Tan	Northeast of Nui Dat, Phuoc Tuy Province, South Vietnam. Famous battle site - on the 18 August 1966, D Company, 6 RAR killed 245 VC/NVA for the lost of 18 Australians.
Nui Dat	Location of 1 ATF base and Luscombe airfield, Phuoc Tuy Province, South Vietnam
Nui Dat 2	Small hill to the east of Nui Dat near Long Tan, Phuoc Tuy Province, South Vietnam.
Perth	Capital City of the State of Western Australian. SAS Regiment is located in a Suburb of Perth 'Swanbourne'.
Phan Rang	245 kilometres northeast of Saigon. Location of 2 Squadron, RAAF (Canberra Bombers) - Callsign 'Magpie'.
Phu Tho	Suburb of Saigon, near racecourse and Tan Son Nhut airport. Location of Australian HF Transmitters and HQ 145 Signal Squadron then 110 Signal Squadron until 1968.
Phu Bai	Near Hue (southeast), South Vietnam.
Pleiku	Town, central South Vietnam, in the Annam highlands, Pleiku Province, South Vietnam. Pleiku was at the center of many critical actions of the Vietnam War, including a guerrilla attack on a U.S. special forces camp in 1965, which provoked the first sustained U.S. air raids of the war.
Rockhampton	Queensland, Australia. Near Shoalwater Bay Training Area.
Saigon	Capital of South Vietnam until 1975 - Now called 'Ho Chi Minh City'.
SWBTA	Shoalwater Bay Training Area - Near Rockhamton, Queensland, Australia.
Tan Son Nhut	Saigon Airport, South Vietnam.
VC Hill	Vung Tau, Phuoc Tuy Province, South Vietnam. Site for some of 145 then 110 Signal Squadron communications equipment.

Vung Tau	Town with port and all-weather airfield, Phuoc Tuy Province, South Vietnam. 1 ALSG location. 145 then 110 Signal Squadron main location.
Wacol	Australian Army base in Brisbane, Queensland, Australia. 104 Signal Squadron raised at this base in November 1965.
Watsonia	Suburb of Melbourne, Victoria, Australia. 6 Signal Regiment locations. AUSTCAN gateway to Australia.
Xuyen Moc	On route 23 about 32 Kilometres east of Baria (and Nui Dat), Phuoc Tuy Province, South Vietnam.

LIST OF SIGNAL UNITS AND THEIR OC's - SO Sigs/CSO, AFV

709 SIGNAL TROOP

APR 65 to JUN 66

(Element from 2 SIGNAL REGIMENT)

CAPT R.L.C. TWISS

APR 1965 - JUN 1966

527 SIGNAL TROOP

SEPT 65 - OCT 66

(Element from 2 SIGNAL REGIMENT)

2LT R.M. LONIE

SEP 1965 - OCT 1966

145 SIGNAL SQUADRON

MAR 66 to MAR 67

506, 520, 552, 581, 527 and 709 Signal Troops

Note: 527 and 709 Signal Troops absorbed into the Squadron.

(Element from 2 SIGNAL REGIMENT)

MAJ J.H. BIRD

MAR 1966 - MAR 1967

103 SIGNAL SQUADRON

MAY 66 to APR 67

MAJ P.D. MUDD

APR 1966 - MAY 1967

547 SIGNAL TROOP

JUN 66 to DEC 71

(Element from 7 SIGNAL REGIMENT)

CAPT T.J. RICHARDS

JUN 1966 - APR 1967

CAPT W.E. HUGHES

APR 1967 - FEB 1968

MAJ P.T. MURRAY

FEB 1968 - SEP 1968

MAJ S.W. HART

SEP 1968 - AUG 1969

CAPT E.W. POULTNEY

AUG 1969 - JUN 1970

CAPT J.E. FENTON

JUN 1970 - JUN 1971

MAJ H.J. O'FLYNN

AUG 1971 - DEC 1971

104 SIGNAL SQUADRON

APR 67 to DEC 71

MAJ G.L. LAWRENCE	APR 1967 - JAN 1968
MAJ N.C. MUNRO	JAN 1968 - JAN 1969
MAJ K.P. MOREL	JAN 1969 - JAN 1970
MAJ N.R. BERGIN	JAN 1970 - JAN 1971
MAJ A.G. ROBERTS	JAN 1971 - NOV 1971

110 SIGNAL SQUADRON

MAR 67 to FEB 72

503, 532, 557, 561, 704, 527 and 709 Signal Troops.
(Element from 2 SIGNAL REGIMENT)

MAJ E.H. HYNES	MAR 1967 - MAR 1968
MAJ C.R. HOOK	MAR 1968 - JUL 1968
MAJ P.L. PERMAN	JUL 1968 - JUL 1969
MAJ M.R. RAMSAY	JUL 1969 - NOV 1969
MAJ M.J. LEMON	NOV 1969 - FEB 1970
MAJ M.R. RAMSAY	FEB 1970 - JUL 1970
MAJ D.R. OVERSTEAD	JUL 1970 - JUN 1971
MAJ P.G. WILKINS	JUN 1971 - FEB 1972

DET 152 SIGNAL SQUADRON

JAN 67 to OCT 71

(Element from SPECIAL AIR SERVICE REGIMENT)

SGT D.A. CROUCHER (3 SAS)	JUN 1966 - MAR 1967
SGT M.P. LYON	MAR 1967 - FEB 1968
SGT D.M. LOWSON	FEB 1968 - SEP 1968
2LT P.J. FITZPATRICK	SEP 1968 - SEP 1969
2LT B.R. SCHWARZ	AUG 1969 - AUG 1970
2LT C. LAWSON-BAKER	AUG 1970 - AUG 1971
2LT R.P. GURNEY	AUG 1971 - OCT 1971

AUSTRALIAN ARMY ASSISTANCE GROUP VIETNAM - SIG DET

FEB 72 to DEC 72

(Element from 2 SIGNAL REGIMENT)

CAPT P.R. MONTGOMERY	FEB 1972 - MAR 1972
WO2 W.J. BANNIGAN	MAR 1972 - MAY 1972
WO2 W.W. RITCHIE-ROBINS	MAY 1972 - DEC 1972

HQ AFV CSO (also SO Sigs - early days)
APR 66 to DEC 72

MAJ J.H. BIRD	MAR 1966 - MAR 1967
MAJ D.J. COMMERFORD	MAR 1967 - OCT 1967
MAJ K.P. CAREY	OCT 1967 - AUG 1968
MAJ C.R. HOOK	AUG 1968 - JAN 1969
LT COL B.H. HOCKNEY	JAN 1969 - JAN 1970
LT COL R.E.P. COWLEY	JAN 1970 - JAN 1971
LT COL G.J. MAPSON	JAN 1971 - DEC 1971

HONOURS AND AWARDS TO SIGNALS IN VIETNAM

This list of has been compiled by Gavin Lee as part of his ongoing research on awards to members of the Royal Australian Corps of Signals (RASigs) since it was formed.

Australian Awards (RASigs Vietnam Only)

Commander of the Bath (CB)

Maj Gen Douglas Vincent ODE MiD (Comd AFV)

Member of the British Empire (MBE)

Maj Barry Ross Tinkler (AATTv)

Maj Trevor Ronald Phillips (HQAFV/AAAGV)

British Empire Medal (BEM)

Sgt Bruce David Arthur Roach (709 Sig Tp)

Sgt Frederick Arthur Thompson (104 Sig Sqn)

Mention in Despatches (MiD)

Maj Keith Paul Morel (104 Sig Sqn)

Maj Peter Douglas Mudd (103 Sig Sqn)

Capt John Kenelm Byrnes (HQAFV)

Lt John Patrick Power (104 Sig Sqn)

2Lt Antony James Morris (AATTv)

WO1 John Joseph Hooker (547 Sig Tp)

WO2 Michael William Gill (AATTv) **[Killed in Action]**

WO2 Terrence Sturges (104 Sig Sqn)

SSgt Luke John Thomas Cherry (4 Fd Regt/110 Sig Sqn)

Sgt Robert Bruce Crawford (110 Sig Sqn)

Sgt Lionel William Porter (110 Sig Sqn)

Cpl James Francis Lorraine (110 Sig Sqn)

Cpl Anthony Richard Williams (110 Sig Sqn)

LCpl Ray Albert Pratt (547 Sig Tp)

Unit Citation for Gallantry (UCG)

Members of RASigs during the Battle of Coral Balmoral as part of the 1st Australian Task Force (Forward). **104 Sig Sqn** (67 x members), **110 Sig Sqn** (9 x members) and **547 Sig Tp** (8 x members). See www.coral-balmoral.au104.org for details and names.

United States of American Awards (Known RASigs Vietnam Only)

Bronze Star with V for Valour

WO2 Michael William Gill (AATTV) **[Killed in Action]**

Legion of Merit

Maj Gen Douglas Vincent OBE MiD (Comd AFV)

Army Commendation Medal for Service

Maj Kenneth James Redman (AATTV)

Capt Robert Alexander Baird (AATTV)

WO2 Thomas McNee (AATTV)

WO2 Geoffrey Ernest Munro (AATTV)

Presidential Unit Citation

(Note: Awarded for period Jan 1967 to 25 Feb 1968 (US Army Advisory Team 1, 3 and 4)
and with 5th Special Forces Group, 1st Special Forces for period from Nov 1966 to Jan 1968)

WO2 Mervyn Bede Cranston (AATTV, US Army Advisory Team 4)

WO2 Thomas McNee (AATTV, US Army Advisory Team 3)

Meritorious Unit Commendation (Two Citations)

Australian Army Training Team Vietnam (AATTV):

Citation 1 for those members of the Team July 1962 to Aug 1969.

US Army Individual Training Group (UITG) Forces Nationale Khmer (Fank) Training Command:

*Citation 2 for those members of the Team in UITG/FANK who served with the
Long Hai and Phuoc Tuy Training Battalions Feb 1971 to 30 Nov 1972 and for
Team members that service with 5th Special Forces Group form 31 Jan to 31
Dec 1968 (43 awarded to AATTV members)*

Citation 1

Maj Barry Ross Tinkler (AATTV)

WO2 Maurice George Anstee (AATTV)

WO2 Mervyn Bede Cranston (AATTV)

WO2 Athol Raymond Folbigg (AATTV)

WO2 Michael William Gill (AATTV) **[Killed in Action]**

WO2 James Husband BEM (AATTV) Note: RASigs/RAInf

WO2 Colin Baxter Judd (AATTV)

WO2 Kevin John Macpherson (AATTV)

WO2 Thomas McNee (AATTV)

WO2 Geoffrey Ernest Munro (AATTV)

WO2 Donald Ernest Watts (AATTV)

Citation 2

WO2 John Andrew James Gibson (AATTv)

WO2 Geoffrey Ernest Munro (AATTv)

Republic of Vietnam Awards (Known RASigs Vietnam Only)

National Order of the Republic of Vietnam - Officer

Maj Gen Douglas Vincent OBE MiD (Comd AFV)

Gallantry Cross with Palm

Maj Gen Douglas Vincent OBE MiD (Comd AFV)

Gallantry Cross with Silver Star

Maj Kenneth James Redman (AATTv)

Maj Barry Ross Tinkler (AATTv)

WO2 James Husband BEM (AATTv) Note: RASigs/RAInf

Gallantry Cross with Bronze Star

WO1 Lindsay Thomas Allen (AATTv)

WO2 Mervyn Bede Cranston (AATTv)

Cross of Gallantry with Palm Unit Citation

547 Signal Troop

Unit members from 13 June 1966 to 23 December 1971

Australia Army Training Team Vietnam

Unit members from 1 July 1962 to 31 October 1971, RASigs as follows:

Maj Barry Ross Tinkler (AATTv)

Maj Roland Paul Webb (AATTv)

Capt Robert Alexander Baird (AATTv)

2Lt Antony James Morris (AATTv)

WO1 Lindsay Thomas Allen (AATTv)

WO2 Maurice George Anstee (AATTv)

WO2 Mervyn Bede Cranston (AATTv)

WO2 Athol Raymond Folbigg (AATTv)

WO2 John Andrew James Gibson (AATTv)

WO2 Michael William Gill (AATTv) **[Killed in Action]**

WO2 James Husband BEM (AATTv) Note: RASigs/RAInf

WO2 Colin Baxter Judd (AATTv)

WO2 Robert Douglas Lawson (AATTV)
WO2 Kevin John Macpherson (AATTV)
WO2 Geoffrey Ernest Munro (AATTV)
WO2 Thomas McNee (AATTV)
WO2 Donald Ernest Watts (AATTV)
WO2 Alan Stewart Williams (AATTV)

Armed Forces Honour Medal 1st Class

Maj Brian Macpherson Edwards (HQAFV)
Maj Kenneth James Redman (AATTV)
Maj Desmond Richings Overstead (110 Sig Sqn)
Maj Barry Ross Tinkler (AATTV)
Capt Gary Robert Bell (HQAFV)
Capt David William Harding (110 Sig Sqn)

Armed Forces Honour Medal 2nd Class

Maj Kenneth James Redman (AATTV)
WO1 Lindsay Thomas Allen (AATTV)
Cpl Anthony Michael Dawes (104 Sig Sqn)

Psychological Warfare Medal 1st Class

Capt Neil Leslie Horn (104 Sig Sqn)

Civil Actions Medal 1st Class

Maj Hugh Clifford Franklin (HQAFV)
2Lt Malcolm Leslie Morrison (1st Psychological Operation Unit)

Civil Actions Medal 2nd Class

Cpl Arthur James Wilkinson (110 Sig Sqn)
LCpl Trevor Ronald Rowland (110 Sig Sqn)

Staff Service Medal 1st Class

Maj Roland Paul Webb (AATTV)

Training Service Medal 1st Class

WO2 John Andrew James Gibson (AATTV)

Cambodian Awards (Known RASigs Vietnam Only)

National Defence Medal with Bronze Star

WO2 John Andrew James Gibson (AATTV)

THE HISTORY OF THE SIGNALS IN VIETNAM PAINTING **(From Signalman Vol. 1 No 1 1978)**

During the withdrawal from Vietnam, the three RA Sigs units serving in the theatre banded together to create an RA Sigs Vietnam Memorial Project and Fund. The units (110 Signal Squadron, 104 Signal Squadron and 547 Signal Troop) made initial contributions totaling \$2670. 110 Signal Squadron, which was thought at the time to be due for disbandment, made the largest contribution (\$1790).

On the return of the three units to Australia, an outline charter was drawn up and a Canberra based committee formed. The initial chairman of the Committee LTCOL P.G. Wilkins (then MAJ Wilkins) was the OC 110 Signal Squadron at the time of the withdrawal from Vietnam. The Committee was tasked to represent the interests of all members of the Corps who had served in the three units (and the direct predecessor units) in Vietnam. The charter was later expanded to include representation for all RA Sigs personnel who served in Vietnam in other appointments.

The initial objective of the Committee was to determine the type of memorial most preferred by the majority of the members of the Corps and then having made this determination to select an appropriate theme for the memorial. It was decided that these objectives would best be achieved by means of the competition.

The winners of the competition were:

Lieutenant Colonel C.R. Hook
Major N.L. Horn
Major R.O. Cook
Warrant Office Class Two E.W. Millington

As a result of this competition, it was decided that the memorial was to be a painting following the tradition established by the First and Second World War paintings already held by the Corps and displayed at the School of Signals. Letters were sent to various artists seeking their interest and inviting them to prepare preliminary sketches for selection by the Committee. The Committee finally commissioned Mr. Ken MacFadyen of Melbourne to complete the memorial painting.

Mr MacFadyen is currently head of the Art Department with ABC Channel 2 in Melbourne. He served in Vietnam from 13 August 1967 to 12 March 1968 as Official War Artist. Most of his time in Vietnam was spent with the Task Force on operations where he saw at first hand RA Sigs units under operational conditions and this is reflected in his painting.

The theme for the painting was determined by the Committee and was to highlight a helicopter deployment into a fire support base, with involvement of the ACV communications centre of 104 Signal Squadron and the AN/MRC-69 radio relay shelter of 110 Signal Squadron.

Many hours of painstaking work has gone into the production of this painting. Two small sketches were first submitted and after agreement had been reached on basics, works began on the full size painting which measures 180cm by 120cm.

This remarkable and striking painting is hung in the foyer of the School of Signals at Watsonia and was dedicated by Brigadier K. P. Morel during RA Sigs Corps week 18-24 November 1979.

Painting - Signals in Vietnam

Pronto in South Vietnam 1962-1972

Attachment B

List of Royal Australian Corps of Signals members that served in South Vietnam 1962-1972

Notes

- 1 A few names are missing including any member posted to a non-signals unit. For example HQAFV, HQ1ATF, HQ1ALSG, AATTV, 32 Small Ship Sqn, etc. Members on detachment from **127 Sig Sqn**, they are either detail as part of a RASigs South Vietnam Unit or HQAFV.
- 2 For RASigs working with Australian Army Assistance Group Vietnam (AAAGV), see **Pronto in South Vietnam, Attachment C** for details.
- 3 For RASigs working with 32 Small Ship Squadron, see **Pronto in South Vietnam, Chapter 5, Part 3** for details.
- 4 For RASigs working with Australian Army Training Team Vietnam (AATTV), see **Pronto in South Vietnam, Chapter 5. Part 4** for details.
- 5 The Department of Veterans' Affairs (DVA) Vietnam Veterans Roll has a small number of mistakes in spelling and is missing some names. In addition, a few veterans or their families if deceased have asked for names to be removed. However the Roll is the best online resource and is still being updated with corrections. See <https://nominal-rolls.dva.gov.au>

Royal Australian Corps of Signals, South Vietnam Units and those that served in them (A to Z)
